Contents

1 Introduction **1**

1.1 Focused Ultrasound Applications 2

1.2 Acoustic Lenses 4

1.3 Motivation and Objectives 7

1.4 Structure of the Thesis 8

References 8

2 Fundamentals of Acoustic Wave Diffraction and Propagation **19**

2.1 Diffraction 19

2.2 Propagation 23

2.3 Pressure Radiation from a Circular Planar Transducer 24

2.4 Numerical Simulations 26

2.5 Experimental Measurements 27

References 29

3 On the use of Phase Correction Rings on Fresnel Zone Plates with Ultrasound Piston Emitters **31**

3.1 Introduction 32

3.2 Results 32

3.3 Conclusions 42

References 42

4 Bifocal Ultrasound Focusing using Bi-Fresnel Zone Plate Lenses 45

4.1 Introduction 46

4.2 BiFZP Lens Design 47

4.3 Experimental Results and Discussion 52

4.4 Conclusions 54

References 55

5 Transient Analysis of Fresnel Zone Plates for Ultrasound Focusing Applications 59

5.1 Introduction 60

5.2 Results 61

5.2.1 FZP Transient Duration 61

5.2.2 FZP Transient Response 62

5.3 Methods 69

5.3.1 Rayleigh-Sommerfeld Spectrum 69

5.3.2 Numerical Model 70

5.4 Conclusion 70

References 71

6 Spatio-temporal Ultrasound Beam Modulation to Sequentially achieve Multiple Foci with a Single Planar Monofocal Lens 73

6.1 Introduction 74

6.2 Results 75

6.3 Discussion 81

6.4 Materials and Methods 82

6.4.1 Experimental Set-up 82

6.4.2 Axial Spectrum Simulation 83

References 83

Supplementary Information 86

7 Fractal Lenses based on Cantor Binary Sequences for Ultrasound Focusing Applications 93

7.1 Introduction 94

7.2 Theory 95

7.3 Experimental Results 100

7.4 Conclusion 104

References 104

8 M-bonacci Zone Plates for Ultrasound Focusing 107

8.1 Introduction 108

8.2 M-bonacci Zone Plates 109

8.2.1 Design and Focusing Properties 109

8.2.2 γ-Parameter 115

8.3 Experimental Results and Discussion 119

8.4 Conclusion 121

References 121

9 Liquid-liquid Core-shell Configurable Mesoscale Spherical Acoustic Lens with Subwavelength Focusing **125**

9.1 Introduction 126

9.2 Results 127

9.3 Discussion 134

References 135

10 Tunable Subwavelength Ultrasound Focusing in Mesoscale Spherical Lenses using Liquid Mixtures **139**

10.1 Introduction 140

10.2 Results 142

10.3 Discussion 147

10.4 Methods 148

10.4.1 Numerical Model 148

10.4.2 Experimental Set-up 149

References 149

11 Conclusions **153**

11.1 Summary 153

11.2 Main Conclusions 156
