

## TABLE OF CONTENTS

---

<b>NOMENCLATURE</b> .....	<b>29</b>
<b>INTRODUCTION</b> .....	<b>33</b>
<b>1. Trends and advances in the development of biodegradable active packaging materials for food preservation</b> .....	<b>35</b>
1.1 Bioplastics for food packaging applications .....	36
1.2 Using natural and active compounds to obtain biodegradable active packaging materials.....	39
1.3 Biodegradable multilayer systems for food active packaging applications.....	46
<b>2. Obtaining lignocellulosic fractions from agro-industrial residues for reinforced and active food packaging purposes</b> .....	<b>50</b>
2.1 The problematic generation of agro-industrial wastes and their potential valorisation....	50
2.2 Isolation of cellulosic fractions from agro-industrial wastes .....	53
2.3 Extraction of bioactive compounds from agro-industrial wastes.....	63
<b>3. Rice straw: a versatile agro-industrial waste</b> .....	<b>69</b>
3.1 Rice production and waste management .....	69
3.2 Structure and composition of rice straw .....	70
3.3 Sustainable rice straw management.....	71
<b>4. References</b> .....	<b>78</b>
<b>OBJECTIVES</b> .....	<b>93</b>
<b>CHAPTERS</b> .....	<b>97</b>
<b>CHAPTER 1.I. Application of ultrasound pre-treatment for enhancing extraction of bioactive compounds from rice straw</b> .....	<b>101</b>
<b>ABSTRACT</b> .....	<b>103</b>
<b>1.INTRODUCTION</b> .....	<b>104</b>
<b>2. MATERIAL AND METHODS</b> .....	<b>105</b>
2.1. Chemicals .....	105
2.2. Plant material preparation .....	105
2.3. Aqueous extraction of RS powder.....	105

2.4. Analysis of total phenolic content.....	106
2.5. Modelling extraction kinetics.....	107
2.6. Antioxidant activity by DPPH radical scavenging method .....	108
2.7. Antibacterial bioactivity .....	108
2.8. Particle size distribution in RS powder.....	109
2.9. High-resolution field emission scanning electron microscopy (FESEM).....	109
2.10. Statistical analysis.....	109
<b>3. RESULTS AND DISCUSSION.....</b>	<b>109</b>
3.1. Extraction kinetics of phenolic compounds .....	109
3.2. Extraction kinetics modeling.....	110
3.3. Changes in the plant tissue produced by different extraction processes .....	113
3.4. Bioactive characterization of the extracts .....	116
<b>4. CONCLUSIONS .....</b>	<b>119</b>
<b>5. ACKNOWLEDGEMENTS .....</b>	<b>119</b>
<b>6. REFERENCES .....</b>	<b>120</b>

<b>CHAPTER 1.II. Applying ultrasound-assisted processing to obtain cellulose fibres from rice straw to be used as reinforcing agents .....</b>	<b>125</b>
--	------------

<b>ABSTRACT .....</b>	<b>127</b>
-----------------------	------------

<b>1. INTRODUCTION .....</b>	<b>128</b>
------------------------------	------------

<b>2. MATERIAL AND METHODS .....</b>	<b>130</b>
--------------------------------------	------------

2.1 Plant material and chemicals .....	130
--	-----

2.2 Purification treatments of the cellulosic fraction from RS .....	130
--	-----

2.3 Characterisation of CF from RS .....	131
--	-----

2.4 Reinforcing capacity and effect on physical properties in composite films ....	134
--	-----

2.5 Film characterisation.....	135
--------------------------------	-----

2.6 Statistical analysis.....	136
-------------------------------	-----

<b>3. RESULTS AND DISCUSSION.....</b>	<b>136</b>
---------------------------------------	------------

3.1 Extraction and purification process of CF .....	136
---	-----

3.2 Structural properties .....	139
---------------------------------	-----

3.3 Fourier transform infrared spectroscopy (FTIR) .....	144
--	-----

3.4 Crystallinity analysis .....	145
----------------------------------	-----

3.5 Thermogravimetric analysis .....	147
--------------------------------------	-----

3.6 Reinforcing properties in composite CMC/GA films .....	150
<b>4. CONCLUSIONS .....</b>	<b>152</b>
<b>5. ACKNOWLEDGEMENTS .....</b>	<b>153</b>
<b>6. REFERENCES .....</b>	<b>154</b>

**CHAPTER 1.III. Valorisation of rice straw into cellulose microfibrils for the reinforcement of thermoplastic corn starch films..... 163**

<b>ABSTRACT .....</b>	<b>165</b>
<b>1. INTRODUCTION .....</b>	<b>166</b>
<b>2. MATERIAL AND METHODS .....</b>	<b>167</b>
2.1 Materials .....	167
2.2 Extraction of cellulose microfibre .....	168
2.3 Dry Heating Treatment.....	168
2.4 Film Preparation.....	168
2.5 Material Characterization .....	169
2.6 Statistical Analysis .....	172
<b>3. RESULTS AND DISCUSSION.....</b>	<b>173</b>
3.1 Morphological characterization of CMFs .....	173
3.2 Microstructure of the films .....	175
3.3 Optical properties: colour and transparency .....	177
3.4 Equilibrium moisture content and water solubility .....	179
3.5 Barrier properties to water vapor and oxygen gas .....	180
3.6 Mechanical Properties .....	182
3.7 Thermal Properties.....	183
<b>4. CONCLUSIONS .....</b>	<b>186</b>
<b>5. ACKNOWLEDGEMENTS .....</b>	<b>187</b>
<b>6. REFERENCES .....</b>	<b>188</b>

**CHAPTER 1.IV. Antioxidant poly (lactic acid) films with rice straw extract for food packaging applications .....**

<b>ABSTRACT .....</b>	<b>199</b>
<b>1. INTRODUCTION .....</b>	<b>200</b>
<b>2. MATERIAL AND METHODS .....</b>	<b>202</b>

2.1 Materials .....	202
2.2 Extract preparation .....	202
2.3 Preparation of films.....	202
2.4 Film characterisation.....	203
2.5 Antioxidant activity of the RS extract and films.....	205
2.6 Release kinetics of antioxidant compounds in food simulants.....	205
2.7. Statistical analysis.....	206
<b>3. RESULTS AND DISCUSSION .....</b>	<b>207</b>
3.1 Film characterisation.....	207
3.2 Antioxidant properties of the PLA films containing RS extract.....	213
<b>4. CONCLUSIONS .....</b>	<b>222</b>
<b>5. ACKNOWLEDGEMENTS .....</b>	<b>223</b>
<b>6. REFERENCES .....</b>	<b>224</b>

**CHAPTER 1.V. Using rice straw fractions to develop reinforced, active PLA-starch bilayers for meat preservation..... 231**

**ABSTRACT .....** 233

**1. INTRODUCTION .....** 234

**2. MATERIAL AND METHODS .....** 235

2.1 Materials .....

2.2. Obtaining Rice Straw fractions.....

2.3 The preparation of films.....

2.4 Characterisation of films .....

2.5 Preservation capacity of the bilayer films for fresh pork meat .....

2.6 Statistical analysis.....

**3. RESULTS AND DISCUSSION .....** 241

3.1 Structure and appearance of films.....

3.2 Water relations and barrier and tensile properties of the films.....

3.3 Thermal behaviour .....

3.4 Pork meat preservation with bilayer bags .....

**4. CONCLUSIONS .....** 255

**5. ACKNOWLEDGEMENTS .....** 255

**6. REFERENCES .....** 256

<b>CHAPTER 1.VI. Antioxidant starch composite films containing rice straw extract and cellulose fibres .....</b>	<b>261</b>
<b>ABSTRACT .....</b>	<b>263</b>
<b>1. INTRODUCTION .....</b>	<b>264</b>
<b>2.MATERIAL AND METHODS .....</b>	<b>265</b>
2.1 Chemicals .....	265
2.2. Obtaining Rice Straw fractions .....	266
2.3 Film preparation .....	267
2.4 Film characterisation .....	267
2.5 Statistical analysis.....	271
<b>3. RESULTS AND DISCUSSION .....</b>	<b>271</b>
3.1. Film microstructure and appearance .....	271
3.2. Thermal behaviour of the films .....	275
3.3. Water relations, and mechanical and barrier properties of the films .....	278
3.4. Antioxidant capacity of the films and prevention of sunflower oil oxidation.	280
<b>4. CONCLUSIONS .....</b>	<b>283</b>
<b>5. ACKNOWLEDGEMENTS .....</b>	<b>284</b>
<b>6. REFERENCES .....</b>	<b>285</b>

<b>CHAPTER 2.VII. Active poly (lactic acid) films with rice straw aqueous extracts for meat preservation purposes.....</b>	<b>291</b>
<b>ABSTRACT .....</b>	<b>293</b>
<b>1. INTRODUCTION .....</b>	<b>294</b>
<b>2. MATERIAL AND METHODS .....</b>	<b>296</b>
2.1 Materials .....	296
2.2. Obtaining and characterisation of RS aqueous extracts .....	296
2.3. Film preparation and characterisation.....	298
2.4 Pork meat preservation capacity of the films .....	300
2.5 Statistical analysis.....	301
<b>3. RESULTS AND DISCUSSION .....</b>	<b>301</b>
3.1. Active properties of the RS extracts.....	301
3.2. Properties of the films.....	303

<b>4. CONCLUSIONS .....</b>	<b>313</b>
<b>5. ACKNOWLEDGMENTS.....</b>	<b>313</b>
<b>6. REFERENCES .....</b>	<b>314</b>

<b>CHAPTER 2.VIII. Influence of the cellulose purification process on the properties of aerogels obtained from rice straw .....</b>	<b>323</b>
---	------------

<b>ABSTRACT .....</b>	<b>325</b>
-----------------------	------------

<b>1. INTRODUCTION .....</b>	<b>326</b>
------------------------------	------------

<b>2. MATERIAL AND METHODS .....</b>	<b>328</b>
--------------------------------------	------------

2.1 Materials and plant preparation .....	328
---	-----

2.2 Obtaining cellulosic fractions .....	328
--	-----

2.3 Characterisation of cellulosic fractions .....	329
--	-----

2.4 Production of aerogels .....	332
----------------------------------	-----

2.5 Characterisation of aerogels .....	332
--	-----

2.6 Statistical analysis.....	333
-------------------------------	-----

<b>3. RESULTS AND DISCUSSION .....</b>	<b>334</b>
--	------------

3.1 Properties of cellulosic fractions .....	334
--	-----

3.2 Properties of aerogels .....	344
----------------------------------	-----

<b>4. CONCLUSIONS .....</b>	<b>349</b>
-----------------------------	------------

<b>5. ACKNOWLEDGMENTS.....</b>	<b>349</b>
--------------------------------	------------

<b>6. REFERENCES .....</b>	<b>350</b>
----------------------------	------------

<b>GENERAL DISCUSSION .....</b>	<b>357</b>
---------------------------------	------------

<b>CONCLUSIONS.....</b>	<b>375</b>
-------------------------	------------
