Acknowledgements.....	I
Abstract.....	II
Resum.....	IV
Resumen.....	VI
Contents	VIII
List of figures	XI
List of tables.....	XVI
Nomenclature.....	XVIII
Chapter 1.....	1
1 Introduction	1
1.1 Motivation.....	1
1.2 Solar thermal energy for industry processes	2
1.3 Thermal energy storage (TES).....	13
1.4 Problem description and objectives	18
1.5 Thesis structure	20
Chapter 2.....	23
2 Experimental plant.....	23
2.1 SOLPINVAP solar field description	23
2.2 System operation.....	29
2.3 Control of the SHIP plant	30
2.4 Monitoring system	32
Chapter 3.....	36
3 Solar process heat and TES system modelling.....	36
3.1 SHIP system.....	36
3.2 Solar LFC module model.....	39
3.3 Kettle reboiler model	56
3.4 Pipeline model	60
3.5 Expansion valve model.....	61
3.6 PBTES model	61
3.7 Solar thermal system model description	64

3.8	Integrated system description	66
3.9	Dynamic analysis and operation enhancement	69
3.10	System cost	70
Chapter 4		73
4	Uncertainty analysis of sensors and measurement enhancement	73
4.1	Uncertainty propagation	73
4.2	Energy and mass balance of the system.....	74
4.3	Initial sensors description and uncertainty analysis.....	75
4.4	New sensors and equipment selection to improve monitoring	79
Chapter 5		93
5	System operation	93
5.1	Operation on day 1: Clear-sky	93
5.2	Operation on day 2: Clear-sky, evaporation and water flow modification	97
5.3	Operation on day 3: Cloudy	100
Chapter 6		105
6	Validation of the SHIP model	105
6.1	Weather data: DNI estimation.....	105
6.2	Steady state	109
6.3	Analysis of the complete operation throughout the day	117
Chapter 7		123
7	System design.....	123
7.1	Parametric study	123
7.2	Results analysis.....	127
7.3	Dynamic simulation and analysis of the SHIP system with PBTES	131
7.4	Techno-economic analysis of the SHIP system with PBTES	144
Chapter 8		147
8	Conclusions	147
8.1	Future work.....	149
Publications		151
References		152
Appendixes		164
Appendix A. Kettle reboiler shell and tube heat exchange model		164
A.1. Kettle reboiler description		164

A.2. Shell and tube heat exchanger model	164
A.3. Tube bundle heat flux	165
Appendix B. Uncertainty calculation	168
B.1. Expanded uncertainty of a measurement	168
B.2. Heat uncertainty	168
Appendix C. Equation system	170
C.1. Solar heat for industrial process with packed-bed thermal energy storage model equation system	170
