

TABLE OF CONTENTS

LIST OF TABLES	v
LIST OF FIGURES.....	viii
ABSTRACT	xi
RESUMEN	xiii
RESUM	xv
CHAPTER 1: INTRODUCTION	1
1.1 Background	1
1.2 Motivation	2
1.3 Objectives.....	4
1.4 Organization of the Dissertation	5
CHAPTER 2: STATE OF THE ART: DEMAND RESPONSE IN THE UNITED STATES AND EUROPE.....	7
2.1 Chapter Overview	7
2.2 Demand Response Overview.....	7
2.3 Classification of Demand Response Actions.....	9
2.4 Classification of Demand Response Programs	10
2.4.1 Operation Programs.....	12
2.4.2 Economic Based Programs.....	14
2.5 Demand Response in the United States	15
2.5.1 Operation and Market Organization in the United States of America.....	16
2.5.2 DR Programs Offered by System Operators.....	20
2.5.2.1 New York ISO	20
2.5.2.2 ISO – New England	23
2.5.2.3 PJM	29
2.5.2.4 Electric Reliability Council of Texas.....	31
2.5.2.5 Southwest Power Pool.....	36
2.5.2.6 Midwest ISO	37
2.5.2.7 California ISO	41
2.5.3 DR Programs Offered by Utilities	43
2.5.3.1 Arizona	45
2.5.3.2 California.....	47

2.5.3.3 Connecticut.....	53
2.5.3.4 Delaware.....	54
2.5.3.5 Florida.....	54
2.5.3.6 Georgia.....	56
2.5.3.7 Illinois.....	58
2.5.3.8 Michigan.....	60
2.5.3.9 Washington D.C.....	61
2.6 Demand Response in Europe.....	62
2.6.1 Power Markets in Europe.....	62
2.6.2 Demand Response Programs in Europe.....	64
2.6.2.1 Sweden.....	65
2.6.2.2 Finland.....	66
2.6.2.3 Netherlands.....	66
2.6.2.4 France.....	67
2.6.2.5 Denmark.....	67
2.6.2.6 Norway.....	68
2.6.2.7 United Kingdom.....	69
2.6.2.8 Italy.....	70
2.6.2.9 Spain.....	71
2.7 Conclusions of the Chapter.....	73

CHAPTER 3: METHODOLOGY TO DEFINE NEW DEMAND RESPONSE PROGRAMS BASED ON CUSTOMER FLEXIBILITY: CUSTOMER EVALUATION.....

3.1 Chapter Overview.....	75
3.2 Introduction to the Methodology.....	76
3.3 Definition of Objective Segment.....	78
3.4 Characterization of Processes by End-Use.....	81
3.4.1 Detailed Analysis of the Load Curve.....	84
3.4.2 Physical Modeling.....	86
3.4.2.1 FLEXMOD: the UPV Modeling Tool.....	89
3.5 Determination of Possible Flexibility Actions.....	91
3.5.1 Classification of Flexibility Actions.....	92
3.6 Customer Evaluation.....	93
3.6.1 Technical Evaluation.....	94
3.6.1.1 Technical Evaluation of Flexibility in Flat Shape Processes.....	97
3.6.1.2 Technical Evaluation in Non-Flat Shape Processes.....	98
3.6.2 Economic and Environmental Evaluation.....	99
3.6.2.1 Economic Evaluation.....	99
3.6.2.2 Environmental Evaluation.....	104
3.7 Proposal of Actions.....	106
3.8 Conclusions of the Chapter.....	109

CHAPTER 4: METHODOLOGY TO DEFINE NEW DEMAND RESPONSE PROGRAMS BASED ON CUSTOMER FLEXIBILITY: REGULATORY ASSESSMENT.....

4.1 Chapter Overview.....	110
4.2 Integration of Flexibility in Operation Markets.....	110

4.2.1	Technical Assessment	110
4.2.1.1	Operation Markets in Power Systems	111
4.2.1.2	Customers Providing Operation Services.....	113
4.2.2	Economic Assessment.....	120
4.2.2.1	Avoided Costs Analysis	121
4.3	Definition of Demand Response Programs	125
4.3.1	DR Programs for Operation Markets.....	125
4.4	Validation.....	127
4.5	Conclusions of the Chapter	128
CHAPTER 5: FLEXIBILITY AND EFFICIENCY ACTIONS IN THE FOOD		
INDUSTRY		
5.1	Chapter Overview.....	130
5.2	The Use of Energy in the Food Industry.....	130
5.2.1	Flexibility Strategies in the Food Industry.....	133
5.2.2	Significant Activities in the Food Industry	135
5.2.2.1	Preparation	136
5.2.2.2	Transformation.....	139
5.2.2.3	Preservation.....	140
5.2.2.4	Packaging.....	142
5.3	Application of the Methodology to the Meat Industry.....	142
5.3.1	The Role of the Meat Industry Worldwide	142
5.3.2	Flexible Processes in the Meat Industry.....	144
5.3.3	Description of the Drying Process	145
5.3.3.1	Type of Drying Rooms	145
5.3.3.2	Stages in the Drying Process	146
5.3.3.3	Psychrometric Analysis.....	148
5.3.4	First Strategy: Interruption of Cooling Production and Distribution in Drying Rooms	150
5.3.4.1	Use of Cooling in the Meat Industry.....	150
5.3.4.2	Implementation of the Flexibility Action	154
5.3.5	Second Strategy: Fan Speed Variation in Drying Chambers	155
5.3.5.1	Modeling	156
5.3.5.2	Theoretical Evaluation of the Strategy.....	158
5.3.5.3	Implementation of the Flexibility Action	160
5.4	Conclusions of the Chapter	163
CHAPTER 6: VALIDATION TESTS IN A CURED HAM FACTORY IN SPAIN:		
TECHNICAL EVALUATION		
6.1	Chapter Overview.....	165
6.2	Validation of First Strategy	166
6.2.1	Pre-Evaluation.....	166
6.2.2	Campaign of Interruptions.....	168
6.3	Validation of Second Strategy	169
6.3.1	Description of Considered Drying Chambers	169
6.3.2	Psychrometric Analysis of Drying Chambers	170
6.3.3	Evaluation of Reduced Speed.....	171
6.4	Conclusions of the Chapter	174

CHAPTER 7: ECONOMIC AND ENVIRONMENTAL EVALUATION OF FLEXIBILITY	176
7.1 Chapter Overview	176
7.2 Electricity Market Overview in Spain	177
7.2.1 Market Organization	177
7.2.2 How Do Customers Pay for Electricity in Spain?	178
7.2.2.1 Components of the Electricity Bill	179
7.2.2.2 Hourly Periods of the Contract.....	179
7.2.3 Operation Markets in Spain.....	182
7.3 Economic Evaluation of Flexibility in the Meat Industry.....	184
7.3.1 Cost-Benefit Analysis for the Customer	184
7.3.1.1 Flexibility Costs Evaluation	185
7.3.1.2 Participation in Operation Markets Simulation.....	186
7.3.2 Extrapolation of Results to the Whole Segment.....	193
7.4 Environmental Impact of DR.....	194
7.5 Conclusions of the Chapter	196
 CHAPTER 8: CONCLUSIONS.....	 198
8.1 Conclusions and Contributions of the Dissertation.....	198
8.1.1 Needs Identification: Underutilization of DRR and Requirement of New Tools	198
8.1.2 Development of a New Methodology: Technical and Economic	199
8.1.3 Validation of the Methodology: Application to the Food Industry	199
8.1.4 Use of Flexibility: Simulation of Customers Participation in Operation Markets in Spain	200
8.1.5 Impact on the System: Extrapolation of Results to the Meat Industry Segment in Spain.....	201
8.2 Future Research.....	201

 ABOUT THE AUTHOR	 End Page

LIST OF TABLES

Table 1. System operators in the United States of America.....	17
Table 2. Main characteristics of electricity markets in the U.S.	19
Table 3. Summary of the DR programs offered by the New York ISO.....	23
Table 4. Summary of the DR programs offered by the ISO – New England.....	28
Table 5. Summary of the DR programs offered by the PJM Interconnection.....	31
Table 6. Summary of the DR programs offered by the Electric Reliability Council of Texas	35
Table 7. Summary of the DR programs offered by the Southwest Power Pool	37
Table 8. Summary of the DR programs offered by the Midwest ISO	40
Table 9. Summary of the DR programs offered by the California ISO	42
Table 10. Ranking of the most suitable industrial segments for DR.....	80
Table 11. Emission factors for different sources of energy and countries.....	105
Table 12. Emission factors for different periods in Spain	105
Table 13. Example of identification parameters card on customer flexibility.....	108
Table 14. Technical aspects of primary frequency regulation service.....	116
Table 15. Technical aspects of secondary frequency regulation service	117
Table 16. Technical aspects of voltage control service.....	118

Table 17. Bonus coefficients for special regime generators in Spain.....	119
Table 18. Technical aspects of restoration by means of blackstart capability service.....	120
Table 19. Cost of generating electricity for different technologies in the U.K.....	122
Table 20. U.S. average levelized costs (in ¢ of US\$ and €) for plants entering service in 2016.....	124
Table 21. Classification of the different food production activities.....	131
Table 22. Classification of main processes in the food industry.....	132
Table 23. Meat production around the world (2005), in thousands of tons	143
Table 24. Consumption of electricity (% of total) in three different cured meat factories in Spain	144
Table 25. Breakdown of electricity consumption in different cured meat production factories.....	152
Table 26. Identification parameters card of customer flexibility for strategy 1.....	154
Table 27. Ratios of speed, consumption and power increment in drying chambers.....	161
Table 28. Identification parameters card of customer flexibility for strategy 2.....	162
Table 29. Variation of humidity during the test in drying rooms	167
Table 30. Variation of temperature during the test in drying rooms	167
Table 31. Set point parameters for different drying chambers in a cured-ham factory	170
Table 32. Characteristic points in the psychrometric chart for the different chambers	171
Table 33. Factor and correlation coefficient of the power equation.....	172
Table 34. Ratios of speed, power and time after applying the proposed actions.....	173
Table 35. Definition of periods for peak-shoulder-valley contracts in Spain.....	180

Table 36. Definition of periods in seasonal contracts in Spain.....	182
Table 37. Costs of flexibility for a customer in the meat industry	186
Table 38. Inputs for the IEA task XIII tool – segment of meat products	194
Table 39. Emission factors for a six-period contract in Spain	195
Table 40. Avoided emissions into the atmosphere for one customer.....	196

LIST OF FIGURES
