
CONTENTS

List of Tables	xv
List of Figures	xvii
1 Introduction	1
1.1 Motivation	1
1.2 Objectives	2
1.3 Methodology	3
1.4 Tools and Means	3
1.5 Context	4
1.6 Publications	4
1.7 Dissertation Outline	4
2 Background and State of the Art	7
2.1 Microeconomics	7
2.1.1 The Market	7
2.1.2 Utility function	8
2.1.3 Profits	9
2.1.4 Competition	10

2.1.5	Economic Viability	11
2.2	Game theory	12
2.2.1	Overview and basic concepts	12
2.2.2	Types of games	13
2.3	Non-linear Optimization	17
2.3.1	Static optimization	17
2.3.2	Dynamic Optimization	18
2.4	Network economics	20
3	Analyzed Scenarios	23
3.1	Scenario 1: HTC and MTC Service Provision on a Common Network Infrastructure	23
3.2	Scenario 2: Dynamic Capacity Provision for Wireless Sensors Connectivity	24
3.3	Scenario 3: Wireless Sensor Network-Based Service Provision in a Duopoly Setting with a Monopolist Operator	24
3.4	Scenario 4: Wireless Sensor Network-Based Service Provision in a Duopoly Setting with a Monopolist Operator: A Dynamic Approach	24
4	Scenario 1: HTC and MTC Service Provision on a Common Network Infrastructure	27
4.1	General Model	27
4.2	Game Analysis	29
4.2.1	Game I: Baseline Case - HTC service provision	30
4.2.2	Game II: Duopoly Case - HTC and MTC service provision by two competing operators	32
4.2.3	Game III: Monopoly Case - HTC and MTC service provision by one operator	36
4.3	Results and discussion	36
5	Scenario 2: Dynamic Capacity Provision for Wireless Sensors Connectivity	39
5.1	General Model	39
5.2	Game Analysis	41
5.2.1	Game I: Static Analysis	42

5.2.2	Game II: Dynamic Analysis	45
5.3	Results and discussion	50
5.3.1	OP optimal control and sinks' distribution with static parameters	51
5.3.2	OP optimal control and sinks' distribution with dynamic parameters	52
6	Scenario 3: Wireless Sensor Network-Based Service Provision in a Duopoly Setting with a Monopolist Operator	59
6.1	General Model	59
6.1.1	Sinks	60
6.1.2	Network Operator	61
6.1.3	Users	61
6.1.4	IoT-Service Providers	62
6.2	Game Analysis	62
6.2.1	Game I: OP and Sinks	63
6.2.2	Game II: Internet of Things-Service Providers (IoT-SPs) and Users	66
6.3	Results and Discussion	70
6.3.1	OP Pricing and Profit	72
6.3.2	IoT-SP ₁ and IoT-SP ₂ Pricing and Profits	72
7	Scenario 4: Wireless Sensor Network-Based Service Provision in a Duopoly Setting with a Monopolist Operator: A Dynamic Approach	79
7.1	General Model	79
7.1.1	Sinks	80
7.1.2	Network Operator	80
7.1.3	Users	80
7.1.4	IoT-Service Providers	81
7.2	Game Analysis	81
7.2.1	Game I: OP and Sinks	81
7.2.2	Game II: Internet of Things-Service Providers (IoT-SPs) and Users	82

7.3	Results and Discussion	85
7.3.1	Scenario 1: IoT-SPs dynamic competitions with different number of sinks	85
7.3.2	Scenario 2: IoT-SPs dynamic competitions with same number of sinks	86
8	Conclusions and Future Work	89
8.1	Conclusions (English)	89
8.1.1	Main Contributions	90
8.1.2	Future Work	92
8.2	Conclusiones (Spanish)	92
8.2.1	Principales contribuciones	93
8.2.2	Trabajos futuros	95
	Bibliography	97
	Appendix A Scenario 3: OP Pricing Stage - Solution of KKT Problem	105
	Appendix Abbreviations	107
	Appendix Nomenclature	109
