<b>Abbreviations.....</b>	<b>i</b>
<b>Figures.....</b>	<b>v</b>
<b>Tables.....</b>	<b>ix</b>
<b>Abstract.....</b>	<b>xi</b>
<b>Resumen.....</b>	<b>xv</b>
<b>Resum.....</b>	<b>xix</b>
<b>1. Introduction .....</b>	<b>23</b>
1.1. Motivation .....	23
1.2. Objectives.....	24
1.3. Contributions to knowledge .....	25
1.4. Thesis structure .....	26
<b>2. Effects of alcohol use disorders on the brain .....</b>	<b>29</b>
2.1. Brain structures affected by alcohol intake.....	29
2.1.1. Brain regions involved in executive control and appetitive drive .....	30
2.1.2. Gray matter cortical structures .....	32
2.2. Burden of disease .....	37
2.3. Drug addiction cycle.....	38
2.3.1. Binge/intoxication stage .....	40
2.3.2. Withdrawal/negative affect stage.....	40
2.3.3. Preoccupation/anticipation (craving) stage .....	41
2.3.4. Positive and negative reinforcement .....	41
2.4. Diagnosis and treatment.....	43
2.5. Rat models in alcoholism.....	46
<b>3. Insights into magnetic resonance imaging .....</b>	<b>49</b>
3.1. MRI physics .....	49
3.2. MRI modalities.....	53
3.2.1. Manganese-enhanced MRI .....	53
3.2.2. Functional MRI .....	53

<b>4. Functional brain alterations in the onset of alcohol dependence</b>	<b>57</b>
4.1. Introduction .....	57
4.2. Material and methods .....	60
4.2.1. Animal experiment .....	60
4.2.2. MRI image acquisition .....	63
4.2.3. MRI image preprocessing .....	64
4.2.3.1. rs-fMRI image preprocessing .....	71
4.2.3.2. MEMRI image preprocessing .....	71
4.2.4. Functional connectivity analysis .....	72
4.2.4.1. Classical ICA .....	75
4.2.4.2. Probabilistic ICA .....	77
4.2.4.3. Spatial regression .....	79
4.2.4.4. Between-network comparisons .....	80
4.2.4.5. Explaining correlation changes as additive signal changes .....	82
4.2.5. Brain activity analysis .....	86
4.3. Results .....	88
4.3.1. Group resting-state networks .....	88
4.3.2. Between-network resting-state functional connectivity .....	89
4.3.3. Additive signal changes .....	93
4.3.4. Brain activity changes across control and alcohol conditions .....	94
4.4. Discussion .....	95
4.4.1. Brain activity driven by alcohol .....	96
4.4.2. Explaining neuroadaptive mechanisms with resting-state functional connectivity and activity .....	97
4.4.3. Resting-state functional connectivity in other research studies .....	100
4.4.4. Abstinence .....	102
4.4.5. Technical considerations for resting-state functional connectivity .....	102
4.4.5.1. Anticorrelations between RSNs .....	102
4.4.5.2. Data cleanup .....	103
4.4.5.3. Dimensionality of PICA .....	103
4.4.5.4. Lack of relevant changes in variance across control and alcohol conditions .....	104
4.4.5.5. Effects of anesthesia on resting-state functional connectivity .....	104
4.4.6. Limitations of this study .....	105

4.4.7. Strengths of this study .....	105
4.4.8. Future work recommendations.....	106
4.5. Conclusions .....	107
<b>5. Cortical gray matter alterations in alcohol use disorders .....</b>	<b>109</b>
5.1. Introduction .....	109
5.2. Material and methods.....	110
5.2.1. Demographics of controls and alcohol abstinent patients.....	110
5.2.2. Participant eligibility and recruitment .....	112
5.2.3. MRI image acquisition.....	113
5.2.4. Voxel-based morphometry analysis.....	113
5.2.4.1. Gray matter volume comparisons in control and abstinent participants.....	122
5.2.4.2. Partial correlations between GM volume and alcohol-related variables .....	122
5.3. Results.....	123
5.3.1. GM atrophy in abstinence condition.....	123
5.3.2. Relationship between GM and alcohol consumption .....	126
5.3.2.1. ADS score.....	126
5.3.2.2. Grams of alcohol per drinking day .....	129
5.3.2.3. Total grams of alcohol .....	131
5.3.2.4. Summary of correlation maps .....	133
5.4. Discussion.....	136
5.4.1. GM volume comparisons in control and abstinence conditions .....	136
5.4.2. GM volume correlations with alcohol-related variables.....	141
5.4.3. Challenges in GM segmentation.....	142
5.4.4. Controversial interpretation of VBM.....	143
5.5. Conclusion .....	143
<b>6. Characterizing dynamic brain states in fMRI signals.....</b>	<b>145</b>
6.1. Introduction .....	145
6.2. Material and methods.....	148
6.2.1. Participants and experimental paradigm .....	148
6.2.2. MRI image acquisition.....	149

6.2.3. fMRI image preprocessing.....	149
6.2.4. Probabilistic independent component analysis.....	151
6.2.5. Probabilistic functional modes.....	151
6.2.6. Hidden Markov Model – Gaussian.....	155
6.2.7. Relabeling of HMM-states.....	158
6.2.8. Correlation of static functional connectivity.....	158
6.2.9. Metrics to evaluate brain states' identification.....	159
6.3. Results.....	162
6.3.1. Brain networks.....	162
6.3.2. Mutual information.....	164
6.3.3. Other statistical measurements.....	165
6.3.3.1. <i>Uniquefull</i> covariance.....	165
6.3.3.2. <i>Full</i> covariance.....	166
6.3.3.3. <i>Uniquediag</i> covariance.....	167
6.3.3.4. <i>Diag</i> covariance.....	168
6.3.4. Viterbi path.....	169
6.3.5. Static functional connectivity.....	173
6.3.6. Selected configuration: PFMs and <i>uniquefull</i> covariance.....	175
6.4. Discussion.....	179
6.4.1. PICA versus PROFUMO.....	179
6.4.2. PROFUMO's strengths to extract RSNs' time courses.....	179
6.4.3. Considerations for HMM-Gaussian.....	180
6.5. Conclusions.....	181
<b>7. Conclusions.....</b>	<b>183</b>
<b>Publications.....</b>	<b>185</b>
Derived from the doctoral thesis.....	185
Closely related to the doctoral thesis.....	186
Not directly related to the doctoral thesis.....	188
<b>References.....</b>	<b>191</b>
