

Table of Contents

Chapter 1	1
1.1 Introduction	2
1.2 Reciprocating engines framework.....	2
1.3 Low temperature combustion strategies	20
1.4 Document content and structure	21
1.5 Bibliography	24
Chapter 2	29
2.1 Introduction	31
2.2 Drawbacks of the conventional diesel combustion	32
2.3 Low temperature combustion strategies as a solution to Soot/NO _x trade-off.	36
2.3.1 Mixing-controlled LTC.....	38
2.3.2 Premixing strategies	40
2.4 Drawbacks of the RCCI concept.....	51
2.4.1 CO and uHC emissions: Issue at aftertreatment efficiency.....	52
2.4.2 Pressure gradient at high engine load	54
2.4.3 Air-loop requirements: Massive EGR demands	56
2.4.4 Particulates emitted by compression ignition engines	59
2.5 Approach of the study.....	64
2.5.1 Motivation of the study.....	64
2.5.2 Objectives of the study.....	68
2.5.3 General methodology and research development.....	69

2.6 Bibliography	71
Chapter 3.....	79
3.1 Introduction	81
3.2 Experimental facilities	81
3.2.1 Single cylinder engine	82
3.2.2 Test cell characteristics	86
3.2.3 Instrumentation and measuring equipment	92
3.3 Theoretical tools.....	102
3.3.1 Combustion diagnosis: 0-D model	102
3.4 Summary and conclusions	104
3.5 Bibliography	105
Chapter 4.....	109
4.1 Introduction	111
4.2 Conceptual description.....	112
4.2.1 Low load operation: Fully Premixed strategy	112
4.2.2 Combustion process description (Dual-Fuel strategy) for medium and high load operation.....	113
4.3 Experimental methodology.....	115
4.4 Hardware effects on Dual-Mode Dual-Fuel operational limits 	119
4.4.1 Different compression ratios evaluated	119
4.4.2 Bathtub geometry. Compression ratio of 12.75:1	125
4.4.3 Non re-entrant geometry. Compression ratio of 15.3:1	134
4.4.4 Compression ratio comparison.....	142

4.5 Bibliography	152
Chapter 5.....	155
5.1 Introduction	156
5.2 Experimental procedure and methodology.....	156
5.3 Particle size distribution analysis.....	158
5.3.1 Results under RCCI mode. Comparison with the CDC mode..	158
5.3.2 Results under Dual-Mode Dual-Fuel (DMDF) concept.....	167
5.4 Engine mapping of particles size distribution and particle number under DMDF operation mode	178
5.5 Summary and conclusions	185
5.6 Bibliography	187
Chapter 6.....	191
6.1 Introduction	192
6.2 Summary and conclusions	192
6.3 Suggestions for future work	200
