

Outline

ABBREVIATIONS AND SYMBOLS.....	1
CHAPTER 1: INTRODUCTION.....	7
1.1. PHOTOPHYSICS AND PHOTOCHEMISTRY.....	9
1.1.1. <i>Energy transfer</i>	10
1.1.2. <i>Photoinduced electron transfer</i>	11
1.1.3. <i>Photochemical [2+2] cycloadditions</i>	12
1.2. DNA DAMAGE INDUCED BY LIGHT	14
1.2.1. <i>Direct DNA damage</i>	16
1.2.2. <i>Indirect DNA damage</i>	19
1.3. DNA REPAIR	23
1.3.1. <i>Nucleotide excision repair</i>	23
1.3.2. <i>Base excision repair</i>	24
1.3.3. <i>Photoreactivation</i>	25
1.3.3.1 CPD photolyase mechanism	26
1.3.3.2 (6-4) photolyase mechanism	28
1.3.3.2.1 Investigation of the (6-4) repair mechanism with model compounds.....	32
1.4. REFERENCES	35
CHAPTER 2: GENERAL OBJECTIVES	45
CHAPTER 3: PHOTOREDUCTION OF AN AZETIDINE MODEL OF THE (6- 4) PHOTOPRODUCT	49
3.1 INTRODUCTION	51
3.2 RESULTS AND DISCUSSION	55
3.2.1 <i>Synthesis</i>	55
3.2.2 <i>Fluorescence experiments</i>	60
3.2.3 <i>Electrochemical measurements</i>	68
3.2.4 <i>Photocycloreversion of T_m<>AZT_m</i>	69
3.2.5 <i>Quantum-chemistry determination of the photoreductive properties of T<>AZT</i>	71

3.2.6	<i>Decomposition mechanisms of T<>AZT radical anion.....</i>	72
3.3	CONCLUSIONS	76
3.4	EXPERIMENTAL SECTION.....	77
3.4.1	<i>Synthesis.....</i>	77
3.4.2	<i>NMR Spectra.....</i>	81
3.4.3	<i>Annex.....</i>	93
3.5	REFERENCES.....	94
CHAPTER 4: STUDY OF AZETIDINES CYCLOREVERSION BY OXIDATIVE ELECTRON TRANSFER.....		99
4.1	INTRODUCTION.....	101
4.2	RESULTS AND DISCUSSION	104
4.2.1	<i>Fluorescence experiments.....</i>	104
4.2.2	<i>Electrochemical measurements.....</i>	112
4.2.3	<i>Photocycloreversion for T_m<>AZT_m model.....</i>	113
4.2.4	<i>Quantum-chemistry determination of the photooxidative properties for T_m<>AZT_m model</i>	115
4.2.5	<i>Decomposition mechanism of T<>AZT radical cation.....</i>	116
4.3	CONCLUSIONS	119
4.5	REFERENCES.....	120
CHAPTER 5: PHOTOREPAIR OF THYMINE DERIVED CYCLOBUTANES AND OXETANES BY 8-OXOGUANINE		123
5.1	INTRODUCTION.....	125
5.2	RESULTS AND DISCUSSION	129
5.2.1	<i>Synthesis.....</i>	129
5.2.2	<i>Photocycloreversion.....</i>	132
5.3	CONCLUSIONS	146
5.4	EXPERIMENTAL SECTION.....	147
5.4.1	<i>Synthesis.....</i>	147

5.4.2	<i>NMR spectra</i>	157
5.5	REFERENCES	181
CHAPTER 6: 8-OXOGUANINE AS A POTENTIAL INTRINSIC PHOTOSENSITIZER FOR THE REPAIR OF T(6-4)C PHOTOPRODUCT.....		187
6.1	INTRODUCTION.....	189
6.2	RESULTS AND DISCUSSION	192
6.2.1	<i>Synthesis of AZT</i>	192
6.2.2	<i>Photorepair of AZT by OG</i>	196
6.2.3	<i>Photorepair of AZT by photolyases</i>	201
6.3	CONCLUSIONS.....	204
6.4	EXPERIMENTAL SECTION	204
6.4.1	<i>Oligonucleotide synthesis</i>	204
6.4.2	<i>Photochemical preparation of AZT oligonucleotide</i>	205
6.4.3	<i>Photorepair experiments with OG</i>	205
6.4.4	<i>Photorepair experiments with photolyases</i>	206
6.5	REFERENCES	206
CHAPTER 7: INSTRUMENTATION		211
7.1	NUCLEAR MAGNETIC RESONANCE.....	213
7.2	ABSORPTION MEASUREMENTS.....	213
7.3	FLUORESCENCE MEASUREMENTS	213
7.4	CYCLIC VOLTAMMETRY.....	214
7.5	STEADY-STATE PHOTOLYSIS	214
7.6	HPLC ANALYSES	215
7.7	UPLC-HRMS ANALYSES.....	215
7.8	FEMTOSECOND TRANSIENT ABSORPTION SPECTROSCOPY.....	216
7.9	QUANTUM-CHEMISTRY GROUND-STATE COMPUTATIONS.....	217
CHAPTER 8: GENERAL CONCLUSIONS.....		219
