TABLE OF CONTENTS

I. INTRODUCTION	27
Starch-based coatings for preservation of fruits and vegetables	29
1.1. Requirements of the coating-forming agents to preserve fruits and vegetables	33
1.2. Starch-based edible coatings applied to fruits and vegetables	40
1.3. Antifungal coatings for fruit preservation	47
References	59
II. OBJECTIVES	65
III. CHAPTERS	69
CHAPTER 1. Improving functional properties of cassava starch-based films by incorporating xanthan, gellan or pullulan gums	71
ABSTRACT	73
1. INTRODUCTION	74
2. MATERIALS AND METHODS	76
2.1 Materials	76
2.2 Preparation of films	76
2.3 Film conditioning and storage	77
2.4. Characterisation of films	77
2.5 Statistical analysis	78
3. RESULTS AND DISCUSSION	79
3.1 Barrier properties	79
3.2 Tensile properties	80
3.3. Isothermal water sorption capacity of the films	84
4. CONCLUSIONS	85
REFERENCES	86
CHAPTER 2. Antifungal and functional properties of starch-gellan films containing (Thymus zygis) essential oil	-
ADSTDACT	01

1. INTRODUCTION	92
2. MATERIALS AND METHODS	94
2.1. Materials and reagents	94
2.2. Preparation of liposome dispersions	94
2.3. Preparation of film-forming dispersions and films	94
2.4. Microstructural and physical properties of films	95
2.5. Antifungal tests	98
2.6. Statistical analysis	98
3. RESULTS AND DISCUSSION	99
3.1. Microstructure and EO final retention in the films	99
3.2. Tensile properties	102
3.3. Barrier properties	103
3.4. Moisture content and solubility	104
3.5. Optical properties	104
3.6. Antifungal properties	106
o.o	111
4. CONCLUSIONS	
2	112
4. CONCLUSIONS REFERENCES CHAPTER 3. Wettability of starch-gellan coatings on fruits, as affected by the incorporation of essential oil and/or surfactants	115
4. CONCLUSIONS REFERENCES CHAPTER 3. Wettability of starch-gellan coatings on fruits, as affected by the incorporation of essential oil and/or surfactants ABSTRACT	115

ABSTRACT	137
1. INTRODUCTION	138
2. MATERIALS AND METHODS	141
2.1. Reagents	141
2.2. Preparation of CFS	141
2.3. Rheological behaviour and contact angle of the CFS	142
2.4. Quality of coated fruit	142
2.5. In vivo antifungal assays	144
2.6. Statistical analysis	144
3. RESULTS AND DISCUSSION	145
3.1. CFS properties	145
3.2 Effect of the incorporation of Tween 85 into CFS on apple quality	146
3.3. Effect of CFS on postharvest behaviour and quality of apples and persimmons	148
3.4. Fungal decay	151
4. CONCLUSIONS	154
REFERENCES	155
IV. GENERAL DISCUSSION	159
V. CONCLUSIONS	173
