<b>Abstract</b>	<b>vii</b>
<b>Resumen</b>	<b>ix</b>
<b>Resum</b>	<b>xi</b>
<b>Preface</b>	<b>xiii</b>
<b>Acknowledgements</b>	<b>xv</b>
<b>I Thesis report</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
1.1 Motivation . . . . .	3
1.2 Objective . . . . .	5
1.3 Outline of the thesis . . . . .	6
<b>2 State of the art</b>	<b>7</b>
2.1 Immersed boundary FEM . . . . .	7
2.2 Contact formulations with immersed boundary methods . . . . .	10
<b>3 Problem description</b>	<b>13</b>
3.1 Continuum formulation . . . . .	13
3.2 The Cartesian grid Finite Element Method (cgFEM) . . . . .	17
3.2.1 Numerical integration: surface representation with NURBS . .	18
3.2.2 Error estimation: the Superconvergent Patch Recovery . . . . .	20

<b>4</b>	<b>Contributions</b>	<b>25</b>
4.1	A stabilized augmented Lagrangian contact formulation . . . . .	25
4.1.1	Contact kinematic variables . . . . .	26
4.1.2	Frictionless contact . . . . .	29
4.1.3	Frictional contact . . . . .	33
4.2	Surface definition in cgFEM . . . . .	38
4.3	Towards robust, efficient solvers for non-linear problems based in cgFEM	41
4.3.1	Control of the system ill-conditioning through a displacement-based stabilization . . . . .	41
4.3.2	Improvement of the recovered stress field for contact problems	44
4.4	Application example: patient-specific dental implant simulation . . . .	47
<b>5</b>	<b>Closure</b>	<b>53</b>
5.1	Summary . . . . .	53
5.2	Future developments . . . . .	55
	<b>Bibliography</b>	<b>57</b>
<b>II</b>	<b>Articles</b>	<b>67</b>
	<b>Paper A: A modified perturbed Lagrangian formulation for contact problems</b>	<b>69</b>
	<b>Paper B: Large deformation frictional contact analysis with immersed boundary method</b>	<b>109</b>
	<b>Paper C: On the effect of the contact surface definition in the Cartesian grid finite element method</b>	<b>149</b>
	<b>Paper D: On the use of stabilization techniques in the cgFEM framework for iterative solvers</b>	<b>179</b>
	<b>Paper E: Superconvergent patch recovery with constrains for 3D contact problems within the Cartesian grid Finite Element Method.</b>	<b>205</b>
