DE PROCESSOS AGROALIMENTARIS

**Evaluation of the acid pretreatment of agroindustrial
waste assisted by high-intensity ultrasound for further
bioethanol production**

TESIS DOCTORAL

Presentada por:

Tiago Carregari Polachini

Dirigida por:

Dr. Javier Telis Romero (IBILCE/UNESP – Brasil)

Dr. Juan Andrés Cárcel Carrión (ASPA/UPV – España)

Universitat Politècnica de València

Departamento de Tecnología de Alimentos

Julio, 2019

SUMMARY

1. Background.....	25
1.1. Bioethanol.....	26
1.2. Residues from agroindustry.....	27
1.2.1. Chemical composition.....	28
1.2.2. Cassava bagasse.....	29
1.2.3. Peanut wastes.....	30
1.2.4. Artichoke wastes.....	31
1.3. Pretreatment.....	32
1.3.1. Fragmentation	33
1.3.2. Steam explosion.....	33
1.3.3. Liquid hot water treatment.....	34
1.3.4 Supercritical CO ₂ pretreatment.....	34
1.3.5. Microwave irradiation.....	35
1.3.6. Ozonolysis.....	35
1.3.7. Alkaline pretreatment.....	35
1.3.8. Acid pretreatment.....	36
1.3.9. High-intensity ultrasound.....	37
1.4. Ultrasound.....	38
1.4.1. Classification.....	38
1.4.2. Actuating mechanisms.....	39
1.4.3. Acoustic field characterization.....	40
1.5. Ultrasound-assisted pretreatments.....	42
1.5.1. Nominal frequency.....	42
1.5.2. Nominal power.....	43
1.5.3. Sonication time.....	44
1.5.4. Temperature.....	44
1.5.5. Catalysts.....	45
1.5.6. Suspensions properties.....	46
2. Conclusion of the introduction.....	48
3. Objectives.....	51
3.1. General.....	52

3.2. Specifics.....	52
4. Working plan.....	53
5. Results.....	58
5.1. Chapter 1 – Thermophysical properties of acid suspensions of cassava bagasse.....	59
5.2. Chapter 2 – Rheology of acid suspensions containing cassava bagasse.	85
5.3. Chapter 3 – Rheology of peanut waste suspensions	114
5.4. Chapter 4 – Acoustic fields in suspensions containing cassava bagasse.	141
5.5. Chapter 5 – Acoustic fields in peanut waste suspensions.....	165
5.6. Chapter 6 – Kinects of sugar release from artichoke waste.....	185
5.7. Chapter 7 – Kinetics of sugar release from cassava bagasse.....	212
6. General discussion.....	237
7. General conclusion.....	244
7.1. Thermophysical properties of cassava bagasse suspensions.....	245
7.2. Rheological behavior of cassava bagasse suspensions.....	245
7.3. Rheological behavior of peanut waste suspensions.....	246
7.4. Acoustic fields in cassava bagasse suspensions.....	246
7.5. Acoustic fields in peanut waste suspensions.....	247
7.6. Kinetics of sugar release from artichoke waste.....	247
7.7. Kinetics of sugar release from cassava bagasse.....	248
8. Recommendations.....	250
9. Scientific contributions.....	252
9.1. Research papers.....	253
9.2. Conference papers.....	254
10. References.....	256
