Abstract v
Resumen vii
Resum xi
Contents xv
Chapter 1 1
Introduction 1
Chapter 2 5
State of art 5
2.1. Introduction 5
2.2. Drainage networks adaptation 6
2.3. Use of In-line storm tanks 7
2.4. Single-objective rehabilitation 9
2.5. Multi-objective rehabilitation 10
2.6. Search space reduction methodology 11
Chapter 3 13
Objectives 13
3.1. Objective 13
3.2. Specific objectives 14
Chapter 4 15
Methodology 15
4.1. Introduction 15
4.2. Problem Formulation 17
4.2.1. Decision Variables 17
4.2.2. Cost Functions 19
4.3. Single-objective optimization 22
4.4. Multi-objective rehabilitation 23
4.4.1. Objective functions 24

4.4.2. Proposed methodology 24
4.4.3. Optimization algorithm 25
4.5. Search space reduction methodology 27
4.6. Methodology proposition for multi-objective optimization 31
Chapter 5 33
Case studies and results 33
5.1. Introduction 33
5.2. Application of SO optimization to SN-Network 36
5.3. Application of SO optimization and SSR to E-Chicó. 39
5.4. Sensitivity analysis of the SSR..... 44
5.5. Application of MO optimization to E-Chicó. 46
5.6. Application of the proposed methodology for MO optimization 48
Chapter 6 55
Conclusions and future developments 55
6.1. Introduction 55
6.2. Main contributions and conclusions 55
6.3. Future developments 57
Chapter 7 59
Bibliography 59
Appendices 65
Rehabilitación de redes de drenaje mediante la combinación de tanques de retención y sustitución de conducciones 67
Desarrollo de una metodología para proyectos de rehabilitación de redes de drenaje pluvial bajo escenarios de cambio climático 79
Urban drainage network rehabilitation considering storm tank installation and pipe substitution 95
Multi-objective optimization for urban drainage or Sewer networks rehabilitation through pipes substitution and storm tanks installation 141
Urban drainage networks rehabilitation using multi-objective model and search space reduction methodology 169
