Table of contents

Acronyms **v**

Notation **ix**

1 Introduction **1**
1.1 Background 2
1.1.1 Towards Fifth Generation (5G) 2
1.1.2 5G Requirements 3
1.1.3 Use Cases 4
1.1.4 5G Enablers 6
1.1.5 5G Spectrum Requirements 8
1.1.6 5G Channel Model Requirements and Propagation Scenarios 10
1.2 State of the Art Analysis 11
1.2.1 5G Radio Propagation Channel 11
1.2.2 Propagation Channel models above 6 GHz 15
1.2.3 Serious Game Engineering 18
1.3 Problem and Thesis scope 21
1.4 Thesis objectives 22
1.5 Thesis outline 23
1.6 Thesis publications 23

2 Evaluation of Path Loss Channel models for 5G **25**
2.1 Introduction 26
2.2 IMT-2020 and 3GPP Large-Scale Channel Model 26
2.2.1 Large-Scale Model 27
2.2.2 Small-Scale Model 27
2.2.3 Loss Probability 28
2.3 NYU Propagation Channel Model 28

2.3.1 Large-Scale Model 29
2.3.2 Small-Scale Model 29
2.3.3 Loss Probability 29
2.4 METIS Map-Based Channel Model 30
2.4.1 Large-Scale Model 30
2.4.2 Small-Scale Model 32
2.5 Evaluation of Large-Scale Path Loss Channel Models below 6 GHz 33
2.6 Evaluation of Large Scale Path Loss Channel Models above 6 GHz 36
2.7 Conclusions 41

3 Unity3D Game Engine 43
3.1 Unity Game Engine Description 43
3.2 Unity Interface 44
3.3 Geometry in Unity 45
3.3.1 GameObjects 45
3.3.2 Meshes 45
3.4 Lighting Techniques 46
3.4.1 Real-time Lighting 46
3.4.2 Baked Lighting 46
3.4.3 Pre-Calculated Lighting 47
3.5 Light Types 47
3.6 Light Physics Engine: Ray Tracing 50
3.6.1 Global Illumination 50
3.6.2 Reflections 52
3.6.3 Shadows 54
3.7 Object Properties 54
3.7.1 Materials and Shaders 54
3.7.2 Textures 55
3.8 User Interface 55

4 Light Intensity Model for 5G 57
4.1 Introduction 58
4.2 Light Intensity Model 58
4.2.1 Concept Details 59
4.3 Development of the Scenario of New York University in Unity . 60
4.4 Acquisition of Light Intensity Values 61
4.5 Measurement Campaign of Propagation Losses at 28 and 73 GHz at NYU 62
4.6 Light Intensity Model Calibration 63
4.7 Model Accuracy 66
4.8 Computational Complexity 69

4.9 Conclusions 70

5 Extension of LIM **71**
5.1 Introduction 71
5.2 Diffuse Scattering Measurement Campaign at 26 to 40 GHz . . 73
5.3 Ray Tracing Calibration 76
5.3.1 Analytical Results 81
5.4 LIM Extension 94
5.4.1 Light Rendering Process 96
5.4.2 Results 97
5.4.3 Computational complexity 103
5.5 Conclusions 103

6 A Multi-Purpose Visualization Platform for 5G based on Unity **105**
6.1 Platform description 105
6.2 Simulator Layout 107
6.2.1 Block I: External Inputs 107
6.2.2 Block II: Logical Layer 109
6.2.3 Block III: Use Case Implementation 109
6.2.4 Block IV: Simulation 111
6.2.5 Block V: Presentation Layer 111
6.3 Use Cases 112
6.3.1 Light Intensity Model (LIM) 5G 112
6.3.2 Vehicular Communications Simulation Tool 115
6.3.3 Ray Tracing Simulator for Millimeter Wave (mmW) . . 117
6.4 Conclusions 118

7 Conclusions and future work **121**
7.1 Concluding remarks 121
7.2 Future research lines 124

Appendices **127**
A Unity3D Ray Tracing Implementation 127

References **133**
