

Table of contents

Chapter 1: General Introduction	1
1.1 Supramolecular Chemistry	1
1.1.1 Supramolecular chemistry and molecular recognition	1
1.1.2 From molecular to suramolecular chemistry	3
1.1.3 Molecular recognition (Host – Guest chemistry)	7
1.1.4 Chemical sensors (Chemosensor)	12
1.2 Optical Chemosensors	14
1.2.1 Optical chemosensors design principles.	15
1.2.1.1 “Binding site-signaling subunit” aproach.....	16
1.2.1.2 “Displacement” approach.....	19
1.2.1.3 “Chemodosimeter” paradigm.....	22
1.2.2 Optical signaling mechanisms.	25
1.2.2.1 Colorimetric sensors.	26
1.2.2.2. Fluorometric sensors.	29
1.2.2.2.1. Excited state intramolecular proton transfer (ESIPT)...	29
1.2.2.2.2. Photo-induced electron transfer (PET).	30
1.2.2.2.3. Fluorescence resonance energy transfer (FRET).	31
1.2.2.2.4. Excimer – exciplex formation (EF).	32
Chapter 2: Objectives	35
Chapter 3: 4-(4,5-Diphenyl-1<i>H</i>-imidazole-2-yl)-<i>N,N</i>-dimethylaniline-Cu(II) complex, a highly selective probe for glutathione sensing in water- acetonitrile mixtures	39
3.1 Abstract.....	43
3.2 Introduction	43
3.3 Experimental section	45
3.4 Results and discussion	46
3.5 Conclusion.....	52
3.6 Acknowledgments	53
3.7 Refrences and notes	54

3.8 Supporting Information	56
----------------------------------	----

Chapter 4: A simple and easy-to-prepare imidazole-based probe for the selective chromo-fluorogenic recognition of biothiols and Cu(II) in aqueous environments 63

4.1 Abstract	65
4.2 Introduction.....	65
4.3 Experimental section	70
4.4 Results and discussion	69
4.5 Conclusions.....	78
4.6 Acknowledgements	79
4.7 References and notes	79
4.8 Supporting Information	82

Chapter 5: *N,N*-diphenylanilino-heterocyclic aldehydes based chemosensors for UV-vis/NIR and fluorescence Cu(II) detection 99

5.1 Abstract	103
5.2 Introduction.....	103
5.3 Results and discussion	106
5.4 Conclusions.....	120
5.5 Experimental section	121
5.6 Acknowledgements	125
5.7 References and notes	125
5.8 Supporting Information	129

Chapter 6: 2,4,5-triaryl imidazole probes for the selective chromo-fluorogenic detection of Cu(II). Prospective use of the Cu(II) complexes for the optical recognition of biothiols 139

6.1 Abstract	143
6.2 Introduction.....	144
6.3 Experimental section	147
6.3 Results and discussion	147

6.4 Conclusions.....	157
6.5 Acknowledgements	158
6.6 References and notes	158
6.7 Supporting Information	160
Chapter 7: Conclusions and perspectives.....	165
