Summary	iii
Resumen	vi
Resum	ix
Introduction	1
1 Weighted spaces of continuous functions	10
1.1 Introduction and notation	10
1.2 Weighted Banach spaces of continuous functions	11
1.3 Inductive limits	15
1.4 Projective Limits	23
1.5 Spectrum of the multiplication operator	28
1.6 Topology of the set of multipliers	33
2 Echelon and Co-Echelon spaces	35
2.1 Introduction and notation	35
2.2 Ergodic properties of diagonal operators	36
2.3 Spectrum of diagonal operators	44
2.4 Compactness and boundedness of diagonal operators	47
2.5 About the topology of sets of symbols	54
2.6 Power series spaces	58
3 Banach spaces of analytic functions	63
3.1 Introduction and notation	63
3.2 General Banach spaces of analytic functions	68
3.3 Concrete spaces of analytic functions	73
A Appendix	83
A.1 Notation and definitions	83
A.2 Ergodic properties of operators	85
A.3 Properties of inductive limits	87
A.4 Properties of Echelon spaces and Co-Echelon spaces	89
Bibliography	91
