

ÍNDICE

1. Introducción general	1
1.1. Antecedentes, presente y perspectivas de futuro de la acuicultura	3
1.1.1. La acuicultura en España	7
1.2. Bienestar animal	10
1.2.1 Conceptos básicos y legislación	10
1.2.2 Sistemas efectores de estrés	18
1.2.2.1 Eje hipotalámico-simpático-cromafín y eje hipotalámico-hipofisario-interrenal	20
1.2.2.2 Sistema somatotrópico	24
1.2.2.3 Sistema inmunitario	28
1.2.2.4 Respuesta celular	32
1.3. Las mitocondrias como actores de la respuesta mediada por el estrés	41
1.3.1 Origen y estructura	43
1.3.2 Transporte mitocondrial de proteínas	46
1.3.3 Cadena de transporte de electrones, fosforilación oxidativa y proteínas desacopladoras	48
1.3.4 Disfunciones mitocondriales	52
2. Objetivos y plan de trabajo	55
3. Confinement exposure induces glucose regulated protein 75 (GRP75/ mortalin/ mtHsp70/ PBP74/ HSPA9B) in the hepatic tissue of gilthead sea bream (<i>Sparus aurata</i> L.)	63
3.1. Introduction	66
3.2. Materials and methods	67
3.2.1. Experimental design	67
3.2.1.1. Acute confinement exposure	67
3.2.1.2. Prolonged confinement exposure (pair-fed study)	68
3.2.2. RNA extraction and RT procedure	69
3.2.3. PCR amplification and phylogenetic analyses	69

3.2.4. Gene expression	70
3.2.5. Protein extraction and Western blotting	71
3.2.6. Biochemical assays	72
3.2.7. Statistics	73
3.3. Results	74
3.3.1. Sequence and phylogenetic analyses	74
3.3.2. Acute confinement exposure	79
3.3.3. Prolonged confinement exposure (pair-fed study)	79
3.4. Discussion	84
References	89
4. Differential metabolic and gene expression profile of juvenile common dentex (<i>Dentex dentex</i> L.) and gilthead sea bream (<i>Sparus aurata</i> L.) in relation to redox homeostasis	95
4.1. Introduction	99
4.2. Materials and methods	101
4.2.1. Fish rearing and sampling	101
4.2.2. Hormone and plasma metabolite assays	102
4.2.3. Antioxidant capacity	102
4.2.4. ROS production	103
4.2.5. RNA extraction and RT procedure	103
4.2.6. PCR amplification and sequencing	104
4.2.7. Real-time PCR	104
4.2.8. Statistics	107
4.3. Results	108
4.3.1. Growth performance	108
4.3.2. Metabolic biomarkers	110
4.3.3. Hepatic transcriptome	114
4.4. Discussion	117

References	121
5. Gene expression survey of mitochondrial uncoupling proteins (UCP1/UCP3) in gilthead sea bream (<i>Sparus aurata</i> L.)	127
5.1. Introduction	130
5.2. Materials and methods	131
5.2.1. Animal care and sampling	131
5.2.2. Experimental setup	131
5.2.3. RNA extraction and RT procedure	133
5.2.4. RT-PCR approach for UCP3 amplification	133
5.2.5. UCP expression analyses	134
5.2.6. Statistics	135
5.3. Results	135
5.3.1. Cloning of gilthead sea bream UCPs	135
5.3.2. Gene expression analyses	139
5.4. Discussion	146
References	151
6. Feed restriction up-regulates uncoupling protein 3 (UCP3) gene expression in heart and red muscle tissues of gilthead sea bream (<i>Sparus aurata</i> L.): New insights in substrate oxidation and energy expenditure	157
6.1. Introduction	160
6.2. Materials and methods	161
6.2.1. Animal care, experimental setup and sampling	161
6.2.2. Muscle proximate composition	162
6.2.3. Circulating hormone and lipid profiles	162
6.2.4. Gene expression	163
6.2.6. Enzyme activity assays	163
6.2.6. Mitochondrial isolation and respiration	164
6.2.7. Chemicals	165

6.2.8. Statistical analysis	165
6.3. Results	166
6.3.1. Fish performance and metabolic condition	166
6.3.2. Tissue oxidative capacity	168
6.3.3. UCP3 gene expression	168
6.3.4. Respiration uncoupling	170
6.4. Discussion	170
References	176
7. Discusión general	183
7.1. ¿Por qué la mitocondria?	185
7.2. Análisis filogenético	190
7.3. Regulación transcripcional	196
7.3.1 GRP75/mortalina	196
7.3.2 UCPs	199
7.4 Regulación postranscripcional y respiración mitocondrial	203
7.5. Meta-análisis de la respuesta de estrés mitocondrial	209
8. Conclusiones	215
9. Bibliografía general	219
RESÚMENES	243
