

Table of Contents

Table of Contents	i
List of Figures	iii
List of Tables	vi
1. Introduction	1
1.1 Background of the study and problem statement	2
1.1.1 Land use land cover change	2
1.1.2 Climate change.....	8
1.1.3 Climate and LULC changes.....	14
1.2 Objectives.....	17
2. Material and methods	19
2.1 The study area	21
2.1.1 General description.....	21
2.1.2 Hydrometeorology.....	24
2.1.3 Sediment information	27
2.2 Spatial Information for the input of the model	27
2.3 Sediment information for the input of the model.....	29
2.4 Climate change scenarios	32
2.4.1 CORDEX	32
2.4.2 Bias correction.....	36
2.5 TETIS distributed hydrological model	38
2.5.1 Water sub-model description	38
2.5.2 Sediment sub-model description.....	40
2.5.1 Indices for performance evaluation of predictive models	43
2.5.2 Water sub-model Implementation	44
2.5.3 Sediment sub-model Implementation	46
2.6 AFINS.....	47
2.7 Land change modeler	49
2.8 Scenarios of LULC	52
2.8.1 Conservation scenario	52
2.8.2 Government plan scenario.....	53
2.8.3 Natural vegetation scenario.....	55
2.8.4 Future scenario generated by LCM	56
3. Implementation result	60
3.1 Analysis of historical LULC changes	62
3.2 LCM implementation	64
3.3 TETIS implementation.....	65
3.3.1 Water sub-model	65
3.3.2 Sediment sub-model.....	67
3.4 Preparation of climate change data.....	68
3.4.1 Comparison between historical periods of climate models with the control period.....	69
3.4.1.1 Precipitation.....	69
3.4.1.2 Maximum temperature	72
3.4.1.3 Mean temperature	74
3.4.1.4 Minimum temperature.....	76

3.4.2	Bias correction of climate model	78
3.4.2.1	Precipitation.....	78
3.4.2.1.1	Analysis of rainy and dry season	78
3.4.2.1.2	Analysis in the whole period (rainy and dry season)	79
3.4.2.2	Maximum Temperature	80
3.4.2.3	Mean temperature	82
3.4.2.4	Minimum temperature	83
3.4.2.5	Analysis of discharge.....	84
4.	Impact of land cover change in Hydrological and Sediment Regime with Meteorological Observation	90
4.1	Water balance	92
4.2	Flood regime.....	97
4.3	Soil erosion at catchment scale	100
4.4	Reservoir sedimentation	103
5.	Impact of climate change in Hydrological and Sediment Regime.....	108
5.1	Comparison between corrected RCP 45 and corrected RCP 85	110
5.1.1	Precipitation	110
5.1.2	Maximum, Mean and Minimum Temperature	113
5.2	Water balance	115
5.3	Flood regime.....	118
5.4	Soil erosion at catchment scale	120
5.5	Reservoir sedimentation	123
6.	Comparison and combination of climate change and lulc change impact on the cycle of hydrology and sediment	126
6.1	Water balance	128
6.2	Flood regime.....	131
6.3	Soil erosion at catchment scale.....	134
6.4	Reservoir sedimentation	138
	Conclusion.....	140
	References.....	147
