Abstract	5
Resumen	7
Resum	9
Table of contents	11
Chapter 1 Introduction	15
1.1 Context.....	15
1.2 Motivation of research.....	16
1.3 Objectives.....	18
1.4 General approach.....	19
1.5 Structure of the thesis	21
Chapter 2 Climate change impacts on dam safety	23
2.1 Introduction	24
2.2 Risk analysis approach for structuring climate change impacts	26
2.3 Climate change impacts on dam risk components	27
2.3.1 <i>Loads of the system</i>	29
2.3.1.1 <i>Flood</i>	29
2.3.1.2 <i>Reservoir water levels</i>	33
2.3.1.3 <i>Gate performance</i>	35
2.3.1.4 <i>Flood routing strategy</i>	36
2.3.2 <i>System response</i>	37
2.3.2.1 <i>Failure modes</i>	37
2.3.2.2 <i>Probability of failure</i>	38
2.3.3 <i>Consequences</i>	39
2.3.3.1 <i>Outflow hydrographs</i>	39

2.3.3.2 <i>Socio-economic consequences</i>	40
2.3.4 <i>Summary</i>	43
2.4 <i>Conclusions</i>	45
Chapter 3 Quantification of climate change impact on dam failure risk under hydrological scenarios: a case study from a Spanish dam	47
3.1 <i>Introduction</i>	48
3.2 <i>Methodology</i>	49
3.3 <i>Study case</i>	52
3.4 <i>Data and models</i>	54
3.4.1 <i>Hydro-meteorological data</i>	54
3.4.2 <i>Climate projections</i>	54
3.4.3 <i>Dam risk model</i>	55
3.4.4 <i>Water resource management model</i>	57
3.5 <i>Application of the methodology to the Santa Teresa dam</i>	60
3.5.1 <i>Correction of the RCM projections</i>	60
3.5.2 <i>Hydrological modelling</i>	62
3.5.2.1 <i>Setting and calibration of the model</i>	62
3.5.2.1 <i>Water management model simulation</i>	63
3.5.2.2 <i>Design flood hydrographs</i>	66
3.5.3 <i>Risk modelling</i>	69
3.5.3.1 <i>Previous pool level</i>	69
3.5.3.2 <i>Gate performance</i>	70
3.5.3.3 <i>Floods</i>	71
3.5.3.4 <i>Social consequences</i>	72
3.6 <i>Results and discussion</i>	72
3.7 <i>Conclusions</i>	78
Appendix A: <i>Sensitivity analysis for precipitation Gumbel distribution</i>	80
Data availability	82
Acknowledgments	82
Chapter 4 Comprehensive decision-making approach for managing time dependent dam risks	83
4.1 <i>Introduction</i>	84
4.2 <i>Review of dam risk management approaches based on risk indicators</i> ...	86

4.2.1	<i>Concepts of failure probability and risks</i>	86
4.2.2	<i>Risk evaluation and management</i>	88
4.2.3	<i>Risk reduction indicators</i>	88
4.3	Proposed strategy for long-term dam risk management	90
4.3.1	<i>Re-evaluation of risk concepts</i>	90
4.3.2	<i>Definition of a new time-dependent indicator for the prioritization of risk reduction measures</i>	93
4.3.3	<i>New approach for the prioritization of risk reduction measures</i>	94
4.4	Case study	96
4.4.1	<i>Risk estimation</i>	98
4.4.2	<i>Risk evaluation</i>	99
4.4.3	<i>Analysis of risk reduction measures</i>	100
4.4.4	<i>Computation of risk for each measure</i>	102
4.4.5	<i>Estimation of the AACSLs indicator and ranking of measures</i>	102
4.4.6	<i>Sensitivity analysis</i>	103
4.5	Conclusions	104
Chapter 5 Accounting for climate change uncertainty in long-term dam risk management		107
5.1	Introduction	108
5.2	Climate change uncertainty in dam risk management	110
5.3	A decision-making approach incorporating climate change uncertainty	113
5.3.1	<i>Risk estimation for current and future situations</i>	113
5.3.2	<i>Risk evaluation</i>	114
5.3.3	<i>Definition of potential risk reduction measures</i>	115
5.3.4	<i>Evaluation of measures robustness</i>	116
5.3.4.1	<i>Considerations</i>	116
5.3.4.2	<i>Procedure</i>	118
5.3.4.3	<i>Scenario weighting scheme</i>	119
5.3.5	<i>Definition of prioritization strategy</i>	120
5.3.5.1	<i>Average ranking</i>	121
5.3.5.2	<i>Likelihood of rankings</i>	121
5.3.5.3	<i>Index of ranking coincidence</i>	122
5.3.5.4	<i>Consensus ranking</i>	123

5.3.6	<i>Identification of sequence of implementation</i>	124
5.4	Case study	124
5.4.1	<i>Risk estimation</i>	125
5.4.2	<i>Risk evaluation</i>	125
5.4.3	<i>Definition of risk reduction measures</i>	128
5.4.4	<i>Estimation of the efficiency in risk reduction of each measure</i>	129
5.4.5	<i>Multi-model combination</i>	129
5.4.6	<i>Prioritization strategy</i>	130
5.4.7	<i>Identification of the sequence of implementation</i>	130
5.5	Conclusions	133
Chapter 6 Results and discussion		135
6.1	Quantification of multidisciplinary impacts	136
6.2	Managing time-dependent effects.....	139
6.3	Incorporating climate change uncertainty	142
6.4	Towards an adaptation strategy of dam safety management to climate change.....	145
Chapter 7 Conclusions		147
7.1	General conclusions	147
7.2	Original contributions	148
7.3	Future research lines	150
