Abstract iii

Resumen v

Resum vii

Acknowledgements ix

1 Introduction 1
- 1.1 Motivation and Objectives . . . 1
- 1.2 Thesis Organization . . . 3

2 Joint identification of contaminant source and aquifer geometry in a sandbox experiment with the restart Ensemble Kalman filter *(published in Journal of Hydrology)* 5
- 2.1 Introduction . . . 6
- 2.2 Methodology . . . 8
  - 2.2.1 Groundwater Flow and Solute Transport Equation . . . 8
  - 2.2.2 The Ensemble Kalman Filter . . . 8
- 2.3 Experimental Case . . . 11
  - 2.3.1 Description of the experiment . . . 11
  - 2.3.2 Numerical Model . . . 12
- 2.4 Application . . . 13
  - 2.4.1 Synthetic Sandbox Test . . . 14
  - 2.4.2 Laboratory Sandbox Test . . . 17
- 2.5 Summary and Conclusion . . . 29

3 Contaminant Spill in a Sandbox with non-Gaussian Conductivities: Simultaneous Identification by the Restart Normal-Score Ensemble Kalman Filter *(submitted to Mathematical Geosciences* 31
- 3.1 Introduction . . . 32
- 3.2 Methodology . . . 34
  - 3.2.1 Groundwater Flow and Solute Transport Equations . . . 34
  - 3.2.2 The Ensemble Kalman Filter . . . 35
- 3.3 Sandbox Experiment . . . 40

3.4 Definition of Scenarios and Ensemble Initialization 42
3.5 Performance Evaluation 43
3.6 Results 44
3.6.1 Analysis of the Synthetic Data 44
3.6.2 Analysis of the Sandbox Data 48
3.7 Discussion and Conclusions 56

4 A comparison between ES-MDA and restart EnKF for the purpose of the simultaneous identification of a contaminant source and hydraulic conductivity *(submitted to Journal of Hydrology)* **59**
4.1 Introduction 60
4.2 Methodology 62
4.2.1 Ensemble Kalman filter 62
4.2.2 Ensemble smoother with multiple data assimilation . . 64
4.3 Application 65
4.4 Results 70
4.5 Summary and Discussion 82
4.6 Appendix. Results of scenarios S4 and S5 82

5 Reconstructing the release history of a contaminant source via the ensemble smoother with multiply data assimilation *(ready to submit)* **89**
5.1 Introduction 90
5.2 Methodology 91
5.2.1 Groundwater flow and solute transport equations . . . 91
5.2.2 Ensemble Smoother with Multiple Data Assimilation(ES-MDA) 92
5.2.3 Schemes for the inflation factors α_j 93
5.3 Applications 94
5.3.1 Sandbox Set-up 95
5.3.2 Performance Assessment 95
5.3.3 Synthetic Case 96
5.3.4 Real Case 104
5.4 Summary and Conclusion 108

6 Conclusions 109
6.1 Summary 109
6.2 Suggestions for Future Research 110

Bibliography 113
