# Table of contents

List of Abbreviations ............................................. xiii

1 Introduction ...................................................... 1
  1.1 Background .................................................. 1
  1.2 Problem Formulation ....................................... 9
  1.3 Objectives and Thesis Scope ............................... 10
  1.4 Related Work ............................................... 11
  1.5 Outline of the Thesis and Main Contributions .......... 14
  1.6 List of Publications .................................... 18

2 Diversity Techniques .......................................... 23
  2.1 FEC and Interleaving ..................................... 23
  2.2 Multiple Antennas ......................................... 30
  2.3 Rotated Constellations .................................... 34
  2.4 Time Diversity Techniques ................................. 35
  2.5 Frequency Diversity Techniques ........................... 44
  2.6 Space Diversity Techniques ................................ 47
  2.7 Conclusions ................................................. 52

3 Information-Theoretic Investigation of Diversity Techniques 55
  3.1 Capacity of Fading Channels ............................... 56
  3.2 Time, Frequency and Space Diversity .................... 59
  3.3 Rotated Constellations .................................... 68
  3.4 Conclusions ................................................. 72

4 Combined Diversity in Current Systems ....................... 75
  4.1 Combined Space and Time Diversity in DVB-T .......... 77
  4.2 Combined Space and Time Diversity in DVB-T2 .......... 88
  4.3 Performance Comparison between DVB-T and DVB-T2 .... 105
  4.4 Conclusions ................................................. 106
# TABLE OF CONTENTS

5 Combined Diversity in Next Generation Systems \hfill 109
  5.1 Time Diversity \hfill 110
  5.2 Frequency Diversity \hfill 120
  5.3 Space Diversity \hfill 122
  5.4 Combined Diversity \hfill 125
  5.5 Rotated Constellations \hfill 126
  5.6 Conclusions \hfill 132

6 Design Guidelines and Conclusions \hfill 135
  6.1 Concluding Remarks \hfill 135
  6.2 Recommendations \hfill 139
  6.3 Future Research Topics \hfill 142

References \hfill 145
