

# Index

<b>I. Forewords</b> .....	<b>17</b>
<b>II. Research aim and objectives</b> .....	<b>19</b>
<b>III. Methodology</b> .....	<b>21</b>
<b>PART 1</b> .....	<b>23</b>
<b>1. Current facing methods: a historical review</b> .....	<b>25</b>
1.1. <i>First written sources of the 18th century</i> .....	27
1.2. <i>Manuals of 19th century in Europe</i> .....	41
1.2.1. The flourishing Prussian written production and Koester's manual .....	42
1.2.2. The French example and Horsin-Déon handbook .....	48
1.2.3. The situation in the Italian peninsula and Bedotti's manual .....	51
1.2.4. The noteworthy contributions of Forni and Secco Suardo .....	58
1.2.5. Conservation in Spain. The Example of the Prado Museum and the treatises of Vicente Poleró y Toledo .....	72
1.3. <i>The 20th century between wars and technological progress</i> .....	79
1.4. <i>The 21<sup>st</sup> century and the last shaky developments</i> .....	104
<b>2. Physical and chemical facing mechanisms</b> .....	<b>125</b>
2.1. <i>Canvas paintings</i> .....	126
2.1.1. Rheological behaviour of canvas paintings .....	126
2.1.1.1. Stretcher .....	127
2.1.1.2. Support .....	128
2.1.1.3. Size .....	131
2.1.1.4. Ground .....	132
2.1.1.5. Paint layer .....	133
2.1.1.6. Coatings .....	136
2.1.2. De-adhesion phenomena and cracking mechanisms .....	138
2.2. <i>Classes of facing materials</i> .....	145
2.2.1. Temporary supports .....	145
2.2.1.1. Papers .....	145

2.2.1.2. Nonwoven tissues .....	148
2.2.1.3. General remarks .....	149
2.2.2. Polymer adhesives .....	151
2.3. Adhesion and penetration facing mechanism .....	154
2.3.1. Application .....	156
2.3.2. Setting .....	160
2.3.3. Formation of the adhesive bond.....	161
2.3.4. Facing removal .....	162
2.4. Conservation issues.....	163
2.5. The great misunderstanding: protective and consolidating facing.....	166
<b>PART 2 .....</b>	<b>169</b>
<b>3. The alternative: Remoistenable Temporary Supports (RTS).....</b>	<b>171</b>
3.1. Introduction.....	171
3.2. State of the art .....	172
3.3. Ideal characteristics of RTS facing materials .....	179
3.4. Selection of temporary supports, adhesive dispersions and reactivation solvent....	181
3.4.1. Temporary or interim supports .....	182
3.4.2. Adhesive dispersions .....	184
3.4.3. Reactivation solvent .....	188
3.5. Preparation of remoistenable temporary supports, application and removal from the paint.....	189
3.5.1. Preparation of the RTS .....	189
3.5.2. Application of the RTS on the paint.....	192
3.5.3. Removal of the RTS from the paint .....	194
3.6. Hypothesis on advantages.....	195
<b>4. First experimental stage: remoistenable tissues characterization.....</b>	<b>197</b>
4.1. Materials and methods.....	197
4.2. Chemical and physical characterisation .....	198
4.2.1. Mass loss on drying .....	198
4.2.2. Hardness.....	199
4.2.3. Viscosity .....	200
4.2.4. pH .....	202
4.2.5. Absorbance and evaporation rate.....	203
4.2.6. Dimensional changes .....	204
4.3. Results and discussion .....	205

4.3.1. Mass loss on drying .....	205
4.3.2. Hardness .....	208
4.3.3. Viscosity .....	210
4.3.4. pH .....	213
4.3.5. Absorbance and evaporation rate.....	215
4.3.6. Dimensional changes of supports and remoistenable tissues.....	216
4.4. <i>Conclusions</i> .....	218
4.5. <i>Second set of analyses: mechanical properties</i> .....	222
4.5.1. Analytical method.....	222
4.5.2. Adhesive dispersions .....	224
4.5.2.1. Results and discussion .....	224
4.5.2.2. Conclusions .....	229
4.5.3. Temporary support and RTS .....	230
4.5.3.1. Results and discussion .....	230
4.5.3.2. Conclusions .....	237
<b>5. Second experimental stage: evaluation of the efficiency of remoistenable tissues... 239</b>	
5.1. <i>Summary of analytical methods</i> .....	239
5.2. <i>Mock-ups design</i> .....	240
5.2.1. Theoretical assumptions on mock-ups.....	240
5.2.2. Practical design of basic painting mock-ups .....	243
5.2.2.1. Preparation .....	243
5.2.2.2. UV accelerated ageing .....	247
5.2.3. Painting mock-ups: specific treatment for the evaluation of the permanence of residues and the state of the substrate after the removing of facing.....	248
5.2.4. Paint mock-ups: specific treatment for the evaluation of adhesive penetration in the substrate.....	248
5.2.5. Painting mock-ups: specific treatment for the evaluation of RTS adhesive strength.....	249
5.3. <i>Permanence of residues and modification in test specimens surface</i> .....	250
5.3.1. Materials and methods .....	250
5.3.2. Results of the observation of the first set of specimens with visible light optical microscopy .....	252
5.3.3. Results of the observation of the second set of specimens with UV/visible light optical microscopy .....	278
5.3.4. Results of the observation of the first set of specimens with FESEM .....	291
5.3.5. Conclusions.....	293
5.4. <i>Penetration of the adhesive in the substrate</i> .....	296
5.4.1. Basic principles of micro-Raman spectroscopy.....	296
5.4.2. Instrumentation.....	298
5.4.2.1. Micro-Raman Spectroscopy.....	298
5.4.2.2. Optical microscopy.....	299
5.4.3. Results and discussion.....	300

5.4.3.1. Characterization of Raman spectra of specimens prepared with reference materials .....	300
5.4.3.2. Characterization of Raman spectra of materials used in the mock-ups .....	300
5.4.3.3. Characterization of Raman spectra of materials used in facing.....	309
5.4.3.4. Selection of marker peaks .....	322
5.4.3.5. Analyses on the faced specimens .....	326
5.4.4. Conclusions .....	374
5.5. <i>Assessment of the adhesive strength of selected RTS (Peeling Test)</i> .....	375
5.5.1. Basic principles of Peeling test .....	376
5.5.2. Methodology .....	378
5.5.3. Results and discussion.....	381
5.5.3.1. Peeling at 45 % RH .....	383
5.5.3.1. Peeling at 80 % RH .....	391
5.5.4. Conclusions .....	399
<b>6. General conclusions and further developments .....</b>	<b>403</b>
<b>7. References .....</b>	<b>411</b>
