# Contents

Table of contents xiv  
List of figures xvii  
List of tables xxii  

1 Introduction 1  
1.1 Generic integration Technologies 3  
1.2 Reconfigurable Spectrometers: The Reconfigurable Reflective Arrayed Waveguide Grating (R-RAWG) 5  
1.3 Objectives 7  
1.4 Thesis outline 7  

2 PIC basic building blocks: splitters and fiber couplers 9  
2.1 Background and motivation 9  
2.2 Splitters and combiners 10  
2.2.1 Implementations 11  
2.2.2 Rethinking the design flow for the MMI 14  
2.3 Couplers 17  
2.3.1 Implementations 18  
2.3.2 Edge coupler 20  
2.4 Conclusion and future 27  

3 Tunable Photonic Integrated Mirrors 29  
3.1 Background and Motivation 29  
3.2 Implementations 30  
3.2.1 External mirrors 30  
3.2.2 Periodic structures 31  
3.2.3 Metallic/reflective surfaces 31  
3.2.4 Loop mirrors 33  
3.3 Formalism 33  
3.4 Tunable Loop Mirrors 37
