# Contents

<b>Introduction</b>	<b>1</b>
<b>1 Ensemble smoother with multiple data assimilation</b>	<b>5</b>
1.1 Introduction . . . . .	5
1.2 ES-MDA . . . . .	7
1.3 Undersampling problems . . . . .	11
1.3.1 Covariance localization . . . . .	12
1.3.2 Covariance inflation . . . . .	13
<b>2 Python software package</b>	<b>15</b>
2.1 Introduction . . . . .	15
2.2 Software package structure . . . . .	16
2.3 Input files . . . . .	18
2.4 Modules . . . . .	19
2.5 Tools package . . . . .	26
<b>3 Reverse flow routing</b>	<b>41</b>
3.1 Introduction . . . . .	41
3.2 Synthetic examples . . . . .	43
3.2.1 Reverse flow routing for a linear reservoir . . . . .	45
3.2.2 Reverse flow routing in an open channel . . . . .	49

3.3	Real test case . . . . .	56
3.4	Concluding remarks . . . . .	61
<b>4</b>	<b>Calibration of a numerical hydrological-hydraulic model</b>	<b>65</b>
4.1	Introduction . . . . .	65
4.2	Forward model: Parflood Rain . . . . .	66
4.3	Test cases . . . . .	68
4.3.1	V-shaped rainfall-runoff test case . . . . .	68
4.3.2	Baganza basin cases . . . . .	71
4.4	Concluding remarks . . . . .	77
<b>5</b>	<b>Simultaneous identification of the release history and the source location of a pollutant in groundwater</b>	<b>79</b>
5.1	Introduction . . . . .	79
5.2	Forward problem: groundwater flow and transport . . . . .	83
5.3	Analytical case . . . . .	84
5.3.1	Impact of the concentration sampling scheme . . . . .	88
5.3.2	Impact of the ensemble size and application of localization and inflation techniques . . . . .	91
5.4	Experimental case . . . . .	94
5.4.1	Calibration of the numerical model . . . . .	96
5.4.2	Identification of the release history and the source location	110
5.5	Concluding remarks . . . . .	112
<b>6</b>	<b>Effect of climate change on the groundwater levels: evaluation of local changes as a function of antecedent precipitation indices</b>	<b>117</b>
6.1	Introduction . . . . .	117
6.2	Method . . . . .	119

---

6.2.1	Study area and data . . . . .	119
6.2.2	Drought Indices . . . . .	123
6.2.3	Implemented procedure . . . . .	126
6.3	Results and discussion . . . . .	127
6.3.1	Estimated SPI and SPEI in the historical periods . . . . .	127
6.3.2	Correlation between groundwater levels and drought indices	131
6.3.3	The relationship between groundwater levels and drought indices . . . . .	133
6.3.4	Estimated SPI and SPEI in the future periods . . . . .	136
6.3.5	Future groundwater levels . . . . .	137
6.4	Concluding remarks . . . . .	139
	<b>Conclusions</b>	<b>141</b>
	Suggestions for future research . . . . .	144
