Contents **i**

List of Figures **v**

List of Tables **xiii**

Nomenclature **xv**

1 Introduction **1**
1.1 General context 1
1.2 Objectives and methodology 5
1.3 Thesis outline 6

2 Fundamentals of fuel injection **9**
2.1 Introduction 9
2.2 Description and types of ICEs 11
2.3 Fuel injection process 13
2.3.1 Gasoline injection systems 13
2.4 Gasoline direct injection 18
2.4.1 Introduction to GDI 18
2.4.2 Stratified charge combustion 22
2.4.3 New combustion concepts and GDI technology 25
2.5 GDI fuel injectors 27
2.5.1 Evolution and types of gasoline injectors 27
2.5.2 Test injectors: Multi-hole solenoid driven type 31
2.6 Cavitation and Flash Boiling 38

3 Experimental tools and methodologies 45
3.1 Introduction . . . 45
3.2 Injection system . . . 45
3.2.1 Injectors: Spray G and Denso commercial injector . . . 46
3.2.2 Injector's control unit . . . 46
3.2.3 High pressure system . . . 47
3.3 Rate of injection technique . . . 48
3.3.1 Background . . . 48
3.3.2 Measurement setup and methodology . . . 50
3.3.3 Methodology for rate of injection Modelling . . . 52
3.4 Plastic deformation technique . . . 53
3.4.1 Background . . . 53
3.4.2 Measurement setup and methodology . . . 54
3.5 Momentum flux technique . . . 54
3.5.1 Background . . . 54
3.5.2 Measurement setup and methodology . . . 57
3.5.3 GDI considerations . . . 59
3.6 X-rays measurements . . . 61
3.6.1 Background . . . 61
3.6.2 Pintle motion by x-ray imaging . . . 62
3.6.3 X-ray tomography: internal nozzle geometry . . . 65
3.6.4 X-ray radiography in the near nozzle field . . . 67
3.6.5 X-ray tomography radiography in the near nozzle field . 69
3.6.6 Researched Wall configurations . . . 70
3.7 Optical techniques for spray visualization . . . 71
3.7.1 Background . . . 71
3.7.2 Diffuse back-illumination . . . 71
3.7.3 Mie scattering . . . 72
3.7.4 Single-pass Schlieren technique . . . 73
3.8 Fuel spray image processing methods . . . 75
3.8.1 Image masking . . . 76
3.8.2 Background subtraction . . . 76
3.8.3 Contour detection . . . 77
3.8.4 Contour analysis . . . 79
3.8.5 Data averaging and measurement procedure . . . 80

4 Developing a new GDI facility 83
4.1 Introduction . . . 83
4.2 Design . . . 84
4.2.1 Test chamber requirements . . . 84

4.2.2 Materials and structural design . . . 85
4.2.3 Flow heater module . . . 86
4.2.4 Safe operation . . . 89
4.2.5 Instrumentation . . . 89
4.3 Simulations . . . 90
4.3.1 Vessel integrity analysis . . . 90
4.3.2 Windows integrity analysis . . . 93
4.3.3 Heat module simulation . . . 93
4.4 Tests . . . 96
4.5 Summary . . . 97

5 Characterizing GDI internal and near nozzle flow 99
5.1 Introduction . . . 99
5.2 Rate of injection results . . . 100
5.2.1 Injectors characterization . . . 100
5.2.2 ROI modelling . . . 102
5.3 Plastic deformation technique results . . . 112
5.4 Rate of Momentum results . . . 114
5.5 Hydraulic Analysis . . . 117
5.6 Needle lift comparison . . . 121
5.7 Summary and conclusions . . . 122

6 Characterizing GDI external flow 125
6.1 Introduction . . . 125
6.2 Spray visualization . . . 126
6.2.1 Test plan and optical set up . . . 126
6.2.2 Variations on typical fuel spray parameters . . . 127
6.2.3 Comparing fuels . . . 130
6.2.4 Comparing Nozzles . . . 132
6.2.5 Jet structure/ spray morphology . . . 133
6.2.6 Radial expansion of the spray . . . 142
6.2.7 Approaching the spray collapse . . . 147
6.3 Preliminary work on X-ray Spray G wall impingement . . . 156
6.3.1 Introduction . . . 156
6.3.2 Spray Radiography results . . . 158
6.3.3 Spray Tomography results . . . 168
6.3.4 Analysis of spray penetrations and velocities . . . 170
6.4 Summary and conclusions . . . 175

7 Conclusions and future works 179

7.1 Summary 179
7.2 Future works 183

Appendices **189**

A Graph Appendix **189**
A.1 Spray morphology 189
