

Tabla de Contenido

Resumen	iii
Abstract	vii
Resum	x
Capítulo I. Introducción General	22
1.1. Cambio climático	24
1.2. Influencia del cambio climático en la agricultura	25
1.3. Phaseolus vulgaris L., la judía común	30
1.3.1. Origen de las judías.	30
1.3.2. Importancia del cultivo.	35
1.3.3. Características botánicas.	36
1.3.4. Valor nutricional.	37
1.4. Phaseolus lunatus L. (el garrofón o judías de Lima).	40
1.5. Efectos de la sequía sobre las plantas	41
1.5. Efectos de la salinidad en las plantas.	45
1.6. Requerimientos de agua en los cultivos	52
Capítulo II. Objetivos	56
2.1. Objetivo General	57
2.2. Objetivos específicos	57
Capítulo III. Resultados	59
Subcapítulo 3.1. Screening for salt tolerance in four local varieties of Phaseolus lunatus from Spain	60
3.1.1. Introduction.	61
3.1.2. Materials and Methods.	64
Plant Material.	64
Plant Growth and Stress Treatments.	64
Soil Analysis.	65
Plant Growth Parameters	65
Photosynthetic Pigments.	65

Ion Content Measurements.	66
Osmolyte Quantification.	66
Statistical Analysis.	66
3.1.3. Results	67
Substrate and Plant Growth Analyses.	67
Photosynthetic pigments.	70
Ionic accumulation.	70
Osmolytes accumulation	71
Principal component analysis (PCA)	72
3.1.4. Discussion.....	73
Conclusions.	77
References	77

Subcapítulo 3.2. Morphological and Agronomic Characterization of Spanish Landraces of *Phaseolus vulgaris* L. 82

3.2.1. Introduction	84
3.2.2. Materials and Methods.....	87
Seed Material.	87
Descriptors Used for the Agronomic Characterization.	89
Data Analysis.....	92
3.2.3. Results.....	92
Principal Component Analysis and Cluster Analysis.	94
Description of the Variability of the Whole Set of Accessions and of the Groups Established.	98
Variability of the Whole Set of Accessions.....	98
Description of the Three Accessions with Black-Colored Seeds.	105
Description of the Six Accessions with Brown-Colored Seeds	106
Description of the Seven Accessions with White-Colored Seeds	106
Description of the Accessions with Different Seed Colors and of the Accessions with a Determinate Growth Habit	107
3.2.4. Discussion	108
References	112

Subcapítulo 3.3. The use of proline in screening for tolerance to drought and salinity in common bean (*Phaseolus vulgaris* L.) genotypes..... 115

3.3.1. Introduction	117
Plant Material.....	120
Plant Growth and Stress Treatments.....	122
Quantification of Proline Contents.....	123
Statistical Analysis.....	123

3.3.3. Results	124
Analysis of Variance of Registered Traits	124
Correlation Analysis	128
Principal Component Analysis (PCA)	131
3.3.4. Discussion	135
3.3.5. Conclusions	138
References	140
Subcapítulo 3.4. Role of active transport of potassium to leaves in the mechanisms of tolerance to salinity in common bean (<i>Phaseolus vulgaris</i> L.)	146
3.4.1. Introduction	148
3.4.2. Materials and Methods	150
Plant material	150
Plant growth and stress treatments	151
Osmolyte quantification	151
Monovalent ions measurements	152
MDA and non-enzymatic antioxidants quantification	152
Statistical analysis	153
3.4.3. Results	153
Osmolytes	153
Monovalent ions	155
MDA and chemical antioxidants quantification	155
Factorial ANOVA	158
3.4.4. Discussion	159
3.4.5. Conclusion	162
References	163
Capítulo IV. Discusión General	168
Conclusiones	184
Bibliografía	188
