Summary of doctoral thesis (in English, Spanish and Catalan)	1
Introduction	13
1 Principles and Applications to Underwater Acoustics	15
1.1 History of the applications to underwater acoustics.....	15
1.2 Underwater Electro-Acoustic Transducers.....	17
1.2.1 Underwater acoustic sources and hydrophones.....	20
1.2.1.1 Tonpiliz transducers.....	20
1.2.1.2 High-frequency transducer.....	21
1.2.1.3 Low-frequency transducer.....	22
1.2.1.4 Hydrophones.....	24
1.3 Underwater Acoustics Applications.....	25
1.3.1 Military applications.....	26
1.3.2 Civilian applications.....	27
1.4 Acoustic Positioning.....	28
2 Acoustic Positioning System in Underwater Neutrino Telescopes	31
2.1 Underwater Neutrino Telescopes.....	31
2.2 Acoustic Positioning System of the ANTARES detectors	34
2.3 NEMO Acoustic Positioning System	38
2.4 KM3NeT detector and the proposed Acoustic Positioning System.....	44
3 Transceiver for the KM3NeT Acoustic Positioning System	51
3.1 Transceiver for the KM3NeT Acoustic Positioning System.....	51

3.1.1	The Acoustic Sensors.....	51
3.1.2	The Sound Emission Board.....	54
3.1.2.1	Microcontroller and Signal generator block.....	56
3.1.2.2	The firmware.....	57
3.2	Sensitivity tests of the FFR-SX30.....	58
3.3	Pressure tests.....	65
3.4	Tests on the Transceiver.....	70
3.4.1	Sensitivity tests of the system.....	71
3.4.2	Functionality tests of the system.....	73
4	Integration of the acoustic transceiver in Underwater Neutrino Telescopes	81
4.1	Integration in ANTARES Neutrino Telescope.....	81
4.1.1	SEB for the integration in ANTARES detector.....	85
4.1.2	Transmitting Power of the system for the ANTARES detector.....	88
4.2	Integration in NEMO detector.....	92
4.2.1	Transmitting Power of the system for NEMO detector.....	94
4.2.2	NEMO Phase II joint acoustic tests	98
	Conclusions	105
	Acronyms	109
	References	113
	Acknowledgments	119
