

TABLE OF CONTENTS

CONTEXT	1
MyCyFApp project.....	1
Cystic Fibrosis (CF) and Pancreatic Enzyme Replacement Therapy (PERT).....	7
Dosage criteria in PERT: MyCyFApp approach.....	9
1.INTRODUCTION	13
1.1 Food digestion.....	15
Digestion process.....	15
Digestion and absorption of nutrients.....	23
Factors affecting bioaccessibility and bioavailability of nutrients.....	27
1.2 Gastrointestinal alterations in CF and their impact on digestibility and bioaccessibility of nutrients: MyCyFApp approach.....	31
<i>In vitro</i> digestion model for CF.....	31
Dietary habits in patients with CF defining the focus food groups.....	33
Lipid digestibility of vegetal-origin food products.....	37
References.....	39
2. OBJECTIVES AND WORKING PLAN	48
2.1 Objectives.....	50
2.2 Working plan.....	52
3. MATERIALS AND METHODS	54
3.1. Sample preparation and characterisation.....	56
3.2. Simulation of <i>in vitro</i> gastrointestinal digestion in CF.....	60
3.3 Analytical determinations.....	64
References.....	7
2	
4. RESULTS	74
Chapter 1. Effect of cooking methods and intestinal conditions on lipolysis, proteolysis and xanthophylls bioaccessibility of eggs.	76
Chapter 2. Fat digestibility in meat products: influence of food structure and gastrointestinal conditions.	110

Chapter 3. <i>In vitro</i> study of cheese digestion: effect of type of cheese and intestinal conditions on macronutrients digestibility.	137
Chapter 4. <i>In vitro</i> digestion of salmon: influence of processing and intestinal conditions on macronutrients digestibility.....	166
5. CONCLUDING REMARKS	198
6. FUTURE PERSPECTIVES	204
