| Abstract | iii |
| Resumen..... | v |
| Resum..... | vii |
| Table of contents..... | ix |
| Glossary of terms | xiv |
| Chapter 1. General introduction..... | 1 |
| 1.1 Environmental and production challenges of pig production .. | 1 |
| 1.2 Role of nutrition and slurry management on the sustainability in the pig sector..... | 2 |
| 1.3 Agro-industrial by-products in animal production..... | 4 |
| 1.4 Main agro-industrial by-products in Spain..... | 7 |
| 1.5 Agro-industrial by-products as a source of nutrients in pigs feeding..... | 10 |
| 1.6 Agro-industrial by-products in anaerobic co-digestion of industrial by-products | 13 |
| 1.7 References..... | 16 |
| Chapter 2. Objectives and thesis structure..... | 27 |
| Chapter 3. Nutritional value of crude and partially defatted olive cake in finishing pigs and effects on nitrogen balance and gaseous emissions..... | 29 |
| 3.1 Introduction | 31 |
| 3.2 Material and methods..... | 32 |
| 3.2.1 Animals, diets and experimental design | 32 |
| 3.2.2 Experimental procedures and sample preparation | 35 |
| 3.2.3 Chemical analysis of feeds and effluents | 35 |
| 3.2.4 Gaseous emissions monitoring | 36 |

| | | |
|-------|--|-----------|
| 3.2.5 | Calculations and statistical analysis..... | 37 |
| 3.3 | Results | 38 |
| 3.3.1 | Coefficients of total tract apparent digestibility | 38 |
| 3.3.2 | Composition of effluents | 39 |
| 3.3.3 | Dry matter and nitrogen flows | 42 |
| 3.3.4 | Slurry characteristics and gaseous emissions..... | 42 |
| 3.4 | Discussion | 45 |
| 3.4.1 | Nutritional value of olive cake sources | 45 |
| 3.4.2 | Nutrient balance and effluent composition | 46 |
| 3.5 | Conclusions..... | 47 |
| 3.6 | Acknowledgements..... | 48 |
| 3.7 | References..... | 48 |
| | <i>Chapter 4. Partially defatted olive cake in finishing pig diets: implications on performance, faecal microbiota, carcass quality, slurry composition and gas emission.....</i> | 53 |
| 4.1 | Introduction..... | 57 |
| 4.2 | Material and methods..... | 58 |
| 4.2.1 | Animals, diets and experimental design | 58 |
| 4.2.2 | Growth performance, carcass and meat quality..... | 64 |
| 4.2.3 | Faecal microbiota by culture-based methods..... | 64 |
| 4.2.4 | Slurry measurements and gas emission | 65 |
| 4.2.5 | Chemical analysis..... | 66 |
| 4.2.6 | Statistical analysis..... | 67 |
| 4.3 | Results | 67 |
| 4.3.1 | Partially defatted olive cake and experimental diets composition..... | 67 |
| 4.3.2 | Growth performance, carcass and meat quality..... | 68 |
| 4.3.3 | Microbial counts..... | 71 |

| | | |
|---|--|-----|
| 4.3.4 | Slurry composition and gas emission | 71 |
| 4.4 | Discussion | 71 |
| 4.5 | Acknowledgements | 75 |
| 4.6 | References | 75 |
| <i>Chapter 5. Effects of orange pulp conservation methods (dehydrated or ensiled sun-dried) on the nutritional value for finishing pigs and implications on potential gaseous emissions from slurry.....81</i> | | |
| 5.1 | Introduction | 83 |
| 5.2 | Materials and methods | 84 |
| 5.2.1 | Experimental design and diets | 85 |
| 5.2.2 | Chemical analysis of feeds and excreta..... | 89 |
| 5.2.3 | Gaseous emission measurements..... | 90 |
| 5.2.4 | Statistical analysis and calculations..... | 91 |
| 5.3 | Results | 91 |
| 5.3.1 | Orange pulps chemical composition | 91 |
| 5.3.2 | Apparent digestibility of diets and orange pulps | 92 |
| 5.3.3 | Daily nutrient intake and composition of effluents | 94 |
| 5.3.4 | Slurry excretion and gaseous emissions..... | 96 |
| 5.4 | Discussion | 98 |
| 5.4.1 | Nutritional value of dried orange pulp sources | 98 |
| 5.4.2 | Gaseous emissions from slurry | 99 |
| 5.5 | Conclusions | 101 |
| 5.6 | Acknowledgments | 101 |
| 5.7 | References..... | 102 |
| <i>Chapter 6. Partial replacement of cereals by dehydrated orange pulp in finishing pig diets do not affect performance, health and gaseous emission from slurry.....107</i> | | |
| 6.1 | Introduction | 109 |

| | | |
|--|--|------------|
| 6.2 | Material and methods..... | 111 |
| 6.2.1 | Animals, diets and experimental design | 111 |
| 6.2.3 | Growth performance, carcass and meat quality..... | 114 |
| 6.2.4 | Faecal microbiota by culture-based methods and metabolites..... | 115 |
| 6.2.5 | Slurry measurements and gas emission | 115 |
| 6.2.5 | Chemical analysis..... | 116 |
| 6.2.6 | Statistical analysis..... | 117 |
| 6.3 | Results | 118 |
| 6.3.1 | Dehydrated orange pulp and experimental diets composition..... | 118 |
| 6.3.2 | Growth performance, carcass and meat quality..... | 118 |
| 6.3.3 | Microbial counts and faecal metabolites | 120 |
| 6.3.4 | Slurry composition and gas emission | 121 |
| 6.4. | Discussion | 123 |
| 6.5 | Acknowledgements | 127 |
| 6.6 | References..... | 127 |
| | | |
| Chapter 7. The use of agricultural substrates to improve methane yield in anaerobic co-digestion with pig slurry: Effect of substrate type and inclusion level..... | | 135 |
| 7.1 | Introduction..... | 137 |
| 7.2 | Material and methods..... | 138 |
| 7.2.1 | Substrates and inoculum..... | 138 |
| 7.2.2 | Experimental design and biochemical methane potential determination..... | 139 |
| 7.2.3 | Chemical analyses | 140 |
| 7.2.4 | Extraction of genomic DNA | 141 |
| 7.2.5 | Bacterial and archaeal absolute quantification (qPCR). 141 | |
| 7.2.6 | Data analyses and calculations..... | 143 |

| | | |
|-------|--|------------|
| 7.3 | Results and discussion..... | 144 |
| 7.3.1 | Substrate’s chemical composition | 144 |
| 7.3.2 | Combination’s chemical composition | 146 |
| 7.3.3 | Effect of the type of agricultural substrate on the biochemical methane potential | 148 |
| 7.3.4 | Effect of substrate’s inclusion level on biochemical methane potential..... | 150 |
| 7.3.5 | Microbial community structure and dynamics | 1522 |
| 7.4 | Conclusions..... | 154 |
| 7.5 | Acknowledgements..... | 155 |
| 7.6 | References..... | 155 |
| | Chapter 8. General discussion..... | 161 |
| 8.1 | Characterization of agro-industrial Mediterranean by-products | 161 |
| 8.2 | Valorisation of agro-industrial by-products in pig production.... | 165 |
| 8.2.1 | Uses as feed ingredients in pig nutrition..... | 166 |
| 8.2.2 | Anaerobic co-digestion of agricultural substrates | 172 |
| 8.3 | The role of fibrous agro-industrial by-products in the future | 176 |
| 8.4 | References..... | 180 |
| | Chapter 9. Conclusions..... | 189 |
