

## **Chapter 1. Introduction**

1.1. Use of conventional petroleum sources and heavy oils and residues .....	<b>3</b>
1.2. Biomass as an alternative to fossil fuels .....	<b>6</b>
1.3. Biomass classification .....	<b>7</b>
1.4. Biomass conversion: bio-chemical and thermo-chemical processes .....	<b>9</b>
1.4.1. Bio-chemical processes: fermentation and anaerobic digestion.....	<b>9</b>
1.4.2. Thermo-chemical processes .....	<b>9</b>
1.4.2.1. Combustion.....	<b>10</b>
1.4.2.2. Liquefaction.....	<b>11</b>
1.4.2.3. Pyrolysis .....	<b>11</b>
1.4.2.4. Gasification.....	<b>12</b>
1.5. Tars formation during biomass gasification process.....	<b>14</b>
1.5.1. Tars classification and chemical composition .....	<b>15</b>
1.5.2. Tars evolution with operation conditions during biomass gasification.....	<b>17</b>
1.5.2.1. Temperature.....	<b>17</b>
1.5.2.2. Pressure.....	<b>20</b>
1.5.2.3. Residence time.....	<b>20</b>
1.5.2.4. Gasifying agent: air, steam, steam-oxygen, and CO <sub>2</sub> gasification.....	<b>20</b>
1.5.2.5. Gasifier design .....	<b>23</b>
1.6. Tars removal.....	<b>25</b>
1.6.1. Primary methods .....	<b>26</b>
1.6.2. Secondary methods .....	<b>27</b>

1.7. Catalytic tars upgrading .....	31
1.7.1. Tars reforming .....	32
1.7.2. Tars hydrotreatment .....	35
1.7.2.1. Catalytic hydrotreating .....	37
1.7.2.2. Catalytic hydrocracking.....	38
1.8. References .....	41

## **Chapter 2. Objectives**

2.1. Main objectives .....	55
2.2. Specific objectives.....	56

## **Chapter 3. Experimental procedure**

3.1. Reactants and commercial catalysts.....	59
3.2. Catalysts preparation.....	65
3.2.1. Mixed oxides via co-precipitation method .....	65
3.2.2. Mixed oxides (TiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> and TiO <sub>2</sub> /ZrO <sub>2</sub> ) via incipient wetness impregnation .....	66
3.2.3. Synthesis of Palladium- (and Platinum) based catalysts via incipient wetness impregnation .....	67
3.2.4. Synthesis of bimetallic Palladium-metal based catalysts via incipient wetness impregnation .....	67
3.2.5. Synthesis of Nickel based catalysts via incipient wetness impregnation.....	68
3.2.6. Synthesis of bimetallic Nickel-Platinum based catalysts via incipient wetness impregnation .....	68
3.3. Catalysts analysis and characterization.....	69

3.3.1. Inductively Coupled Plasma Atomic Emission Spectroscopy (ICP-AES) .....	<b>69</b>
3.3.2. X-Ray Diffraction (XRD).....	<b>70</b>
3.3.3. Textural analysis. N <sub>2</sub> adsorption isotherms .....	<b>72</b>
3.3.4. Elemental Analysis (EA).....	<b>74</b>
3.3.5. Temperature-Programmed Desorption (TPD) of ammonia...75	<b>75</b>
3.3.6. Temperature-Programmed Reduction (TPR) .....	<b>76</b>
3.3.7. CO and H <sub>2</sub> Chemisorption.....	<b>77</b>
3.3.8. Scanning Electron Microscope with Energy Dispersive X-ray spectroscopy (SEM-EDX).....	<b>78</b>
3.3.9. Transmission Electron Microscopy (TEM) and High-Resolution Transmission Electron Microscopy (HR-TEM).....	<b>79</b>
3.3.10. X-Ray Photoelectron Spectroscopy (XPS).....	<b>80</b>
3.4. Catalytic tests.....	<b>82</b>
3.4.1. Catalytic mild hydrotreatment of tars-type molecules .....	<b>82</b>
3.4.1.1. Re-uses of the catalyst .....	<b>83</b>
3.4.2. Catalytic selective hydrogenation of fatty acids done at ITQ .....	<b>83</b>
3.4.3. Catalytic selective hydrogenation of fatty acids done at REALCAT platform (Lille-FRANCE).....	<b>84</b>
3.4.4. Reductive amination of acetol to 2-methylpiperazine .....	<b>84</b>
3.5. Analysis of reactions mixtures.....	<b>85</b>
3.5.1. Catalytic mild hydrotreatment of tars-type molecules .....	<b>86</b>
3.5.2. Catalytic selective hydrogenation of fatty acids done at ITQ .....	<b>86</b>
3.5.3. Catalytic selective hydrogenation of fatty acids done at REALCAT platform (Lille-FRANCE).....	<b>87</b>

3.5.4. Reductive amination of acetol to 2-methylpiperazine .....	88
3.6. Calculations.....	89
3.7. References.....	91

## **Chapter 4. Titanium oxide-supported Pd as an efficient and stable catalyst for the mild hydrotreatment of tars-type compounds**

4.1. Introduction .....	95
4.2. Preliminary experiments with Pd-, Pt- and Ru-based commercial catalysts .....	98
4.3. Catalytic screening of Pd supported on different simple metal oxides .....	99
4.4. Effect of Pd content and Pd precursor.....	104
4.5. Effect of TiO <sub>2</sub> crystalline phase used as support.....	111
4.6. Effect of reaction conditions for Pd/TiO <sub>2</sub> Nano catalyst.....	121
4.7. Energy and Hydrogen consumption in function of the temperature using AspenPlus® .....	128
4.8. Reusability tests.....	129
4.9. Comparison with commercial catalysts and previously reported catalysts .....	139
4.10. Effect of Pd doping with another metal .....	142
4.11. Conclusions .....	144
4.12. References .....	147

---

## **Chapter 5. Titania-alumina-supported Pd catalysts for the mild hydrotreatment of tars-type compounds**

5.1. Introduction .....	151
5.2. Catalytic screening of different mixed metal oxides compositions .....	153
5.3. Optimization of TiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> synthesis .....	162
5.3.1. Effect of changing Ti/Al molar ratio.....	162
5.3.2. Effect of pH during synthesis.....	167
5.3.3. Effect of the rate of ammonia solution addition.....	172
5.3.4. Effect of aging time.....	178
5.4. Reusability tests for Pd supported on TiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> .....	184
5.5. Comparison of Pd supported on $\gamma$ -Al <sub>2</sub> O <sub>3</sub> , TiO <sub>2</sub> Nano and TiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> .....	193
5.6. Pd supported on TiO <sub>2</sub> / $\gamma$ -Al <sub>2</sub> O <sub>3</sub> as an efficient and cheap catalyst for the mild hydrotreatment of tars-type compounds .....	203
5.7. Application scope: Pd supported on TiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> as an efficient catalyst for the reductive amination of bio-derived acetol to 2-methylpiperazine .....	211
5.8. Conclusions .....	215
5.9. References .....	217

---

## **Chapter 6. Ni-based catalysts for hydrogenation reactions**

6.1. Introduction .....	<b>221</b>
6.2. Ni-based catalysts for the mild hydrotreatment of tars-type compounds .....	<b>221</b>
6.3. Ni-based catalysts for the selective hydrogenation of fatty acids for hydrocarbons and/or alcohols production .....	<b>226</b>
6.3.1. Introduction .....	<b>226</b>
6.3.2. Catalytic screening of Ni-based catalysts .....	<b>229</b>
6.3.3. Influence of the addition of Pt to Ni supported on TiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> and TiO <sub>2</sub> /ZrO <sub>2</sub> catalysts.....	<b>232</b>
6.3.4. Evaluation of monometallic Ni and bimetallic PtNi supported on TiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> and TiO <sub>2</sub> /ZrO <sub>2</sub> catalysts by varying the catalyst loading .....	<b>236</b>
6.3.5. Influence of reaction temperature on the activity of monometallic Ni and bimetallic PtNi supported on TiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> and TiO <sub>2</sub> /ZrO <sub>2</sub> catalysts.....	<b>240</b>
6.3.6. Influence of hydrogen concentration on the activity of monometallic Ni and bimetallic PtNi supported on TiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> and TiO <sub>2</sub> /ZrO <sub>2</sub> catalysts.....	<b>245</b>
6.3.7. Comparison of catalytic results of experiments at different reaction temperatures, with changes in hydrogen concentration and catalyst loading .....	<b>248</b>
6.3.8. Influence of the hydrogen concentration (and pressure) on the activity of monometallic Ni and bimetallic PtNi supported catalysts by working at 225 °C .....	<b>250</b>
6.3.9. Proposed reaction mechanism .....	<b>253</b>
6.3.10. Catalysts characterization .....	<b>256</b>
6.3.10.1. X-ray diffraction (XRD) .....	<b>257</b>

6.3.10.2. Temperature-programmed reduction (TPR) .....	260
6.3.10.3. Ammonia temperature-programmed adsorption-desorption (NH <sub>3</sub> -TPD) .....	264
6.3.10.4. Microscopy and H <sub>2</sub> chemisorption measurements.....	265
6.3.10.5. XPS measurements .....	274
6.4. Conclusions .....	277
6.5. References .....	279

## **Chapter 7. General conclusions**

7.1. General conclusions.....	285
-------------------------------	-----

## **Chapter 8. List of figures and tables**

8.1. List of figures.....	293
8.2. List of tables.....	301

## **Chapter 9. Annex**

9.1. For Chapter 4.....	309
9.2. For Chapter 5.....	313
9.3. For Chapter 6.....	317
