Contents

1 Introduction and Objectives **1**

1.1 Introduction . . . 1

1.1.1 Justification . . . 1

1.1.2 Background . . . 2

1.1.3 Proposed Solution . . . 17

1.2 Objectives . . . 18

1.2.1 General Objective . . . 18

1.2.2 Specific Objectives . . . 18

1.3 Contributions . . . 18

2 A Methodology for Discriminant Time Series Analysis Applied to Microclimate Monitoring of Fresco Paintings **21**

2.1 Abstract . . . 22

2.2 Introduction . . . 22

2.3 Materials and Methods . . . 26

2.3.1 Materials: Description of the Data Sets . . . 26

2.3.2 Statistical Methods . . . 27

2.4 Results . . . 45

2.5 Discussion . . . 49

2.6 Conclusion . . . 52

3 Multivariate Time Series Analysis of Temperatures in the Archaeological Museum of L'Almoina (Valencia, Spain) **53**

3.1 Abstract . . . 54

3.2 Introduction . . . 54

3.3 Background . . . 58
3.3.1 Studies for the Long-Term Preservation of Artworks . . . 58
3.3.2 European Standards . . . 58
3.3.3 Characteristics of the L'Almoina Museum . . . 59
3.4 Materials and Methods . . . 59
3.4.1 Materials: Description of the Datasets . . . 59
3.4.2 Data Calibration . . . 60
3.4.3 Statistical Methods . . . 60
3.5 Results and Discussion . . . 79
3.5.1 Identification of Structural Breaks in the Time Series . . . 79
3.5.2 Calculation of Classification Variables—M1–M4 . . . 80
3.5.3 Determination of Number of Classes and Class per Sensor Using PCA and K-Means Algorithm . . . 81
3.5.4 Sensor Classification Using sPLS-DA . . . 83
3.5.5 Sensor Classification Using Random Forest Algorithm . . . 86
3.5.6 Methodology to Select a Subset of Sensors for Future Monitoring Experiments in the Museum . . . 96
3.6 Conclusions . . . 99

4 Characterization of Temperature Gradients According to Height in a Baroque Church by Means of Wireless Sensors 101
4.1 Abstract . . . 102
4.2 Introduction . . . 102
4.2.1 Microclimatic Monitoring for the Preservation of Cultural Heritage 105
4.2.2 Microclimatic Studies with Sensors Located at Different Heights . 106
4.3 Materials and Methods . . . 110
4.3.1 Description of the Monitoring System . . . 110
4.3.2 Experiment for the Calibration of Temperature Sensors . . . 112
4.3.3 Installation of Wireless Nodes . . . 113
4.3.4 Data Pretreatment . . . 115
4.3.5 Statistical Methods . . . 116
4.4 Results and Discussion . . . 130
4.4.1 Vertical Gradients of Temperature . . . 131
4.4.2 Ventilation of the Church of Saint Thomas and Saint Philip Neri . 137
4.4.3 Application of sPLS to Identify Key Features Correlated with Height 138
4.4.4 Discrimination of Sensors in Three Categories by Means of LDA . 142
4.5 Conclusions . . . 146

5 General Discussion **149**

6 General Conclusion **155**
