Abstract	iii
Resumen	v
Resum	vii
Acknowledgements	ix
List of Figures	xv
List of Tables	xix
List of symbols	xxi
Abbreviations and Acronyms	xxv
1 Introduction	1
1.1 Motivation	1
1.2 Objectives	4
1.3 Organization of the thesis	5
2 State of the Art	7
2.1 Acoustic Sensor Networks	7
2.1.1 Sensor Networks Overview	7
2.1.2 Passive Acoustic Networks	8
2.1.3 Active Acoustic Networks	10
2.1.4 ASN design challenges	11
2.1.5 ASN commercial systems	13
2.2 Acoustic Networks based on mobile devices	15
2.2.1 Mobile device development	15
2.2.2 Android structure	17
2.3 Communication protocols	19
2.4 Psychoacoustics	21
2.4.1 Human hearing system	21
2.4.2 Critical Bands	24

2.4.3	Masking between signals	27
3	Sound Masking on ASN	33
3.1	Spectral masking model	34
3.2	Auditory masking model	36
3.2.1	Background	36
3.2.2	Overall masking curve computation	37
3.3	Tonality Estimator Model	42
3.3.1	Background	42
3.3.2	Spectral Flatness Method	43
3.3.3	Aures Method	44
3.3.4	Offset Function	51
3.3.5	Subjective Experiments	53
3.3.6	Conclusions	65
3.4	Perceptual Audio Equalization	66
3.4.1	Overview	66
3.4.2	Perceptual equalization algorithm	69
3.4.3	Efficient spectral masking Model	77
3.4.4	Perceptual experiment	85
3.4.5	Conclusions	94
3.5	Smart Active Noise Equalizer	96
3.5.1	Overview	96
3.5.2	Active noise equalization algorithm	97
3.5.3	Perceptual experiment	103
3.5.4	Conclusions	114
3.6	Conclusions	115
4	Analysis of an Android ASN	117
4.1	Acoustic Network Model	118
4.2	Study of the audio latency	121
4.2.1	Definition of the audio latency	121
4.2.2	Audio Latency Estimation	126
4.2.3	Experimental study	127
4.2.4	Conclusions	135
4.3	Clock Synchronization	136
4.3.1	Background	136
4.3.2	Proposed Synchronization Time Protocol (STP) . .	139
4.3.3	Node Task Synchronization (NTS) method	143
4.3.4	Experimental analysis of the clock offset estimates .	146

4.3.5	Synchronization evaluation for a reproduction task	149
4.3.6	Conclusions	155
4.4	Audio Latency Compensation	156
4.4.1	Overview	156
4.4.2	The audio latency compensation (ALC) method	158
4.4.3	Performance of the ALC method	163
4.4.4	Conclusions	178
4.5	Personal Sound Zone (PSZ)	179
4.5.1	Introduction	179
4.5.2	PSZ system in a two-node Android wireless ASN	184
4.5.3	Implementation of the PSZ applications	187
4.5.4	Experimental validation	188
4.5.5	Conclusions	196
4.6	Conclusions	197
5	Conclusions	201
5.1	Summary	201
5.2	Future Work	203
5.3	List of Publications	205
5.4	Institutional Acknowledgements	207
Appendices		209
A	Android Application	210
B	Procedure to search acoustic nodes inside the network	216
C	Optimal Buffer Length for Android acoustic nodes	219
Bibliography		225
