

TABLE OF CONTENTS

Acknowledgements	II
Abstract	III
Resumen	IV
Resum	V
List of Publications	VI
Table of Contents	VII
List of figures	XI
List of tables	XXII
List of abbreviations and nomenclature	XXIII
Chapter 1 Introduction	1
1.1. Research Background	1
1.2. Scope of the work	3
1.1. Aims and Objectives	5
1.2. Research novelty	5
1.3. Thesis structure	7
Chapter 2 3D Printing	11
2.1. Introduction	11
2.2. History and purposes of use	11
2.3. Design possibilities	21
2.4. Overview of current technologies	27
2.5. Rise of desktop 3d printing	32
Chapter 3 Fused Filament Fabrication	39
3.1. Introduction	39
3.2. FFF 3D printers components	40
3.3. FFF Process	45
3.4. Summary	52
Chapter 4 Design for Additive Manufacturing	53
4.1. Introduction	53
4.2. Use of AM potentials	56
4.3. Design rules	59
4.4. Combined methods	64

4.5. Summary	66
Chapter 5 Design Features determination	67
5.1. Introduction	67
5.2. Prior work	68
5.3. Features identification	69
5.4. Features identification	71
5.5. Overhangs, bridges and angles GBTAs study	73
5.6. Benchmarking geometries proposal	86
5.7. Results	91
5.8. Summary	93
Chapter 6 Mechanical properties	95
6.1. Introduction	95
6.2. Effect of infill parameters on tensile behaviour	98
6.2.1. Introduction	98
6.2.2. Literature review	99
6.2.3. Materials and methods	104
6.2.4. Results and discussion	108
6.2.5. Conclusions	115
6.3. Study: Determination of infill density and pattern influence in the bending behaviour	116
6.3.1. Materials and methods	119
6.3.2. Results and discussion	123
6.3.3. Conclusions	131
6.4. Mechanical properties studies. Conclusions	132
6.5. Summary	133
Chapter 7 Post-processing of FFF parts	135
7.1. Introduction	135
7.2. Support removal	137
7.3. Surface modification	140
7.3.1. Heat	143
7.3.2. Chemical solutions	145
7.3.3. Mechanical	150
7.3.4. Surface modification. Summary	162

7.4. Coating	162
7.5. Assembly	172
7.6. Summary	180
Chapter 8 Perception of components due to surface quality	183
8.1. Abstract	183
8.2. Introduction	184
8.3. Materials and methods	187
8.4. Results	190
8.5. Conclusions	192
Chapter 9 Case study. Thumb orthosis	195
9.1. Abstract	195
9.2. Introduction	196
9.2.1. Anatomical data acquisition	198
9.2.2. Additive Manufacturing of orthoses	199
9.2.3. Post-treatment of FFF parts	201
9.2.4. Open lattice structures in orthoses design	201
9.3. Aims and objectives	202
9.4. Method	202
9.4.1. 3D Scan data acquisition	203
9.4.2. CAD process	204
9.4.3. 3D Printing	207
9.4.4. Support removing	207
9.4.5. Surface treatment	208
9.4.6. Fastening	210
9.5. Cost analysis	210
9.6. Results and discussion	213
9.7. Conclusions and further research	215
Chapter 10 Development of a DfAM toolkit	217
10.1. Introduction	217
10.2. Toolkit structure	220
10.3. Identify requirements	221
10.4. Concept design. Ideation cards	222
10.5. Extract design solutions	226

10.6. Embodiment Design	230
10.6.1. Main design considerations	232
10.6.2. Design features	244
10.6.3. Assembly considerations.	253
10.7. Prototype	260
10.8. Deliver	262
10.9. Summary	262
Chapter 11 Evaluation of the toolkit & case studies	263
11.1. Introduction	263
11.2. Methodology. Design of the trial	265
11.3. Results & discussion	267
11.3.1. Case study. Telescopic phone holder	270
11.3.2. Survey	274
11.4. Conclusions & future work	275
Chapter 12 Discussion and Conclusions	277
12.1. Introduction	277
12.2. Achievement of research objectives	278
12.3. Contribution to knowledge	280
12.4. Limitations of the research	282
12.5. Future work	283
Bibliography	285
Appendix 1. Design guide	329
Appendix 2. Ideation cards	357
Appendix 3. Worksheet	361
