

Table of contents

Abstract	v
Resum	vii
Resumen	iv
Acknowledgments	xi
1. Introduction	
1.1. Rationale	1
1.1.1. The LASAGNE project	2
1.1.2. Header processing	6
1.2. Thesis objectives	7
1.3. Outline of this work	8
1.4. References	10
2. Architectures and technologies to implement all-optical logic gates: state of the art	
2.1. Introduction	13
2.2. Architectures for all-optical logic gates	14
2.2.1. SAGNAC interferometers	16
2.2.2. The Ultrafast Nonlinear Interferometer (UNI)	23
2.2.3. Logic gates based on nonlinearities on SOAs	24
2.2.4. The SOA based Mach-Zehnder Interferometer	27
2.3. Summary and conclusions	30
2.4. References	32

3.	Optical logic gates based on SOA-MZI	
3.1.	Introduction	41
3.2.	Interferometry	42
3.3.	All-optical logic gates employing the SOA-MZI	45
3.3.1.	XOR	45
3.3.2.	AND	57
3.3.3.	OR	60
3.3.4.	NOT	65
3.4.	Summary and conclusions	68
3.5.	References	70
4.	Optical correlator (I): Configuration based on cascaded SOA-MZIs	
4.1.	Introduction	73
4.2.	Simulation study	75
4.2.1.	Architecture and principle of operation	75
4.2.2.	Simulation results	77
4.3.	Experimental validation	78
4.3.1.	Set-up for two-bit correlator	78
4.3.2.	Experimental results	80
4.4.	Summary and conclusions	83
4.5.	References	84
5.	Optical correlator (II): N-bit logic XOR gate with feedback	
5.1.	Introduction	87
5.2.	Simulation study	88
5.2.1.	Principle of operation	88
5.2.2.	Proposed architecture	89
5.2.3.	Simulation results	92
5.3.	Experimental validation	98
5.3.1.	Set-up for two-bit correlator	98
5.3.2.	Principle of operation	99
5.4.	Design of a mask layout for a PIC	102
5.4.1.	ePIXnet	102
5.4.2.	Design of the mask layout	102
5.4.	Summary and conclusions	105
5.5.	References	107

6. Applications of all-optical logic gates in practical scenarios	
6.1. Introduction	109
6.2. All-optical packet routing scheme based on SOA-MZIs: a first approach	110
6.2.1. All-optical packet router architecture	110
6.2.2. Simulation results of all-optical packet routing	113
6.3. All-optical label processing and forwarding in the frame of LASAGNE project	116
6.3.1. All-optical routing concept	117
6.3.2. Implementation of sub-systems	119
6.3.3. Experimental results	120
6.4. Multilogic project: an overview	123
6.4.1. Design of a multi-function photonic device for optical computing	124
6.5. Summary and conclusions	125
6.6. References	126
7. Summary and conclusions	
7.1. Summary and conclusions	129
7.2. Future research	132
7.3. References	134
Appendix A. List of Ph.D. publications	136
Appendix B. Boolean Truth Tables	141
List of acronyms	147
List of figures	151
List of tables	155
