List of Figures	xvii
List of Tables	xxi
1 Introduction	1
1.1 Motivation	3
1.2 Objectives	6
1.3 Framework	7
1.4 Main contributions	9
1.4.1 Contributions to weakly supervised learning	9
1.4.2 Contributions to few-shot learning	11
1.4.3 Contributions to unsupervised anomaly segmentation	12
1.5 Outline	14
2 Going deeper through the Gleason scoring scale	17
2.1 Introduction	21
2.2 Related work	24
2.2.1 Computer vision in prostate cancer histology	24
2.2.2 Patch-level Gleason grading	26
2.2.3 Biopsy scoring	27
2.3 Methods	27
2.3.1 Patch-level Gleason grading	27
2.3.2 Cribriform pattern detection	30
2.3.3 Whole slide image Gleason scoring	31
2.4 Experimental setting	31
2.4.1 Materials: SICAP database	31
2.4.2 Metrics	36
2.5 Results	37
2.5.1 Patch-level Gleason grading	37
2.5.2 Model interpretation	40
2.5.3 Validation on external datasets	43

2.5.4	Cribriform pattern detection	46
2.5.5	WSI-level Gleason scoring	48
2.6	Conclusions	54
3	Weakly supervised segmentation of Gleason grades	57
3.1	Introduction	60
3.2	Related work	62
3.2.1	Weakly-supervised semantic segmentation	62
3.2.2	Weakly-supervised segmentation in histology images	64
3.2.3	Prostate Gleason grading	65
3.3	Methods	66
3.3.1	WeGleNet: weakly-supervised Gleason grading network	66
3.3.2	Global-aggregation layers	69
3.3.3	Global Gleason scoring	69
3.4	Experimental setting	70
3.4.1	Datasets	70
3.4.2	Experimental strategy and metrics	71
3.4.3	Baselines	72
3.5	Results	74
3.5.1	Model optimization	74
3.5.2	Qualitative evaluation	76
3.5.3	Weak supervision vs. strong supervision	76
3.5.4	State-of-the-art comparison	79
3.6	Conclusions	81
4	Self-learning for weakly supervised classification	83
4.1	Introduction	86
4.2	Related work	89
4.2.1	Self-learning	89
4.2.2	Multiple instance learning	90
4.2.3	Gleason grading in prostate histology images	91
4.3	Methods	92
4.3.1	Teacher model	93
4.3.2	Student model	95
4.3.3	Biopsy-level Gleason scoring	96
4.4	Experimental setting	96
4.4.1	Dataset	96
4.4.2	Metrics	98
4.4.3	Implementation details	98
4.4.4	Baselines	99
4.5	Results	101

4.5.1	Grading of local patterns	101
4.5.2	Biopsy-level scoring	105
4.5.3	Qualitative evaluation	107
4.6	Conclusions	107
5	Proportion constrained weakly supervised classification	111
5.1	Introduction	113
5.2	Related work	115
5.2.1	Multiple Instance Learning	115
5.2.2	Constrained classification	115
5.3	Methods	116
5.3.1	Inequality constraints for MIL	118
5.3.2	Incorporating proportion information	120
5.4	Experimental setting	121
5.4.1	Datasets	121
5.4.2	Implementation details	123
5.4.3	Baselines	124
5.4.4	Evaluation metrics	124
5.5	Results	125
5.5.1	Comparison to the literature	125
5.5.2	Ablation studies	128
5.5.3	Qualitative evaluation	130
5.6	Conclusions	132
6	Supervised contrastive learning-guided prototypes	135
6.1	Introduction	138
6.2	Related Work	140
6.2.1	Railway track surveying	140
6.2.2	Learning from limited data	142
6.3	Methods	143
6.3.1	Data acquisition	143
6.3.2	Feature extraction	143
6.3.3	Supervised contrastive feature learning	144
6.3.4	Prototypical inference	146
6.4	Experimental setting	147
6.4.1	Dataset	147
6.4.2	Implementation details	148
6.4.3	Baselines	148
6.4.4	Evaluation metrics	149
6.5	Results	150
6.5.1	Crossing wear detection	150

6.5.2	Ablation studies	150
6.5.3	On system explainability	155
6.6	Conclusions	156
7	Constrained unsupervised anomaly segmentation	159
7.1	Introduction	162
7.2	Related Work	164
7.2.1	Unsupervised anomaly segmentation	164
7.2.2	Unsupervised anomaly segmentation in medical imaging .	165
7.2.3	Constrained segmentation	166
7.3	Methods	167
7.3.1	Vanilla VAE	167
7.3.2	Size regularizer via VAE attention	169
7.3.3	Extended log-barrier as an alternative to penalty-based functions	170
7.3.4	On the role of gradients in VAEs	171
7.3.5	Entropy maximization as a proxy for the constraint . . .	173
7.3.6	Inference	174
7.4	Experimental setting	174
7.4.1	Datasets	174
7.4.2	Evaluation metrics	175
7.4.3	Implementation details	176
7.4.4	Baselines	176
7.5	Results	177
7.5.1	Comparison to the literature.	177
7.5.2	Ablation experiments	178
7.5.3	Generalization to other datasets	184
7.5.4	Qualitative evaluation	186
7.6	Conclusions	188
8	Final conclusions	191
8.1	Global remarks	193
8.2	Specific remarks	193
8.3	Future work	196
	Merits	199
	Bibliography	201
