<b>ABBREVIATIONS .....</b>	<b>4</b>
<b>I. INTRODUCTION.....</b>	<b>7</b>
<b>1. Water and viruses.....</b>	<b>7</b>
<b>2. Water safety .....</b>	<b>13</b>
<i>2.1. Urban Water Cycle.....</i>	<i>13</i>
<i>2.2. Control of viruses in water.....</i>	<i>14</i>
<i>2.3. Viral indicators for tracking domestic wastewater contamination in the aquatic environment.....</i>	<i>17</i>
<i>2.4. Viral concentration procedures in waters.....</i>	<i>20</i>
<b>3. Molecular methods.....</b>	<b>21</b>
<i>3.1. RT-qPCR and Digital RT-qPCR .....</i>	<i>21</i>
<i>3.2. Capsid integrity quantitative PCR to assess virus potential infectivity .....</i>	<i>22</i>
<i>3.3. Porcine Gastric Mucin (PGM) capsid-integrity assay.....</i>	<i>26</i>
<i>3.4. Metagenomics and high-throughput sequencing for environmental samples.....</i>	<i>26</i>
<b>4. Wastewater based epidemiology.....</b>	<b>29</b>
<b>5. COVID-19 pandemic.....</b>	<b>30</b>
<b>II. OBJECTIVES.....</b>	<b>32</b>
<b>III. RESULTS.....</b>	<b>35</b>
<b>1. Chapter 1. Development of procedures to concentrate and detect Hepatitis E Virus in water samples.....</b>	<b>35</b>
<i>1.1. HEV Occurrence in Waste and Drinking Water Treatment Plants.....</i>	<i>35</i>
<b>2. Chapter 2. Impact of library preparation when characterising the virome of influent and effluent samples from wastewater treatment plants. ....</b>	<b>61</b>
<i>2.1. Bias of library preparation for virome characterization in untreated and treated wastewaters.....</i>	<i>61</i>
<b>3. Chapter 3. Prevalence of enteric viruses and viral indicators in influent and effluent water samples from wastewater treatment plants .....</b>	<b>85</b>
<i>3.1. Monitoring Human Viral Pathogens Reveals Potential Hazard for Treated Wastewater Discharge or Reuse.....</i>	<i>85</i>

<b>4. Chapter 4. Implementing a SARS-CoV-2 monitoring system in wastewater: Wastewater Based Epidemiology (WBE) as an early-warning tool for pandemics response management.</b>	<b>126</b>
4.1. <i>SARS-CoV-2 RNA in wastewater anticipated COVID-19 occurrence in a low prevalence area</i>	126
4.2. <i>Spatial and temporal distribution of SARS-CoV-2 diversity circulating in wastewater</i>	150
<b>5. Chapter 5. Evaluation of different procedures for coronaviruses' nucleic acid detection in water matrices.</b>	<b>175</b>
5.1. <i>Comparing analytical methods to detect SARS-CoV-2 in wastewater</i>	175
5.2. <i>Recovering coronavirus from large volumes of water</i>	198
<b>6. Chapter 6. Implementing rapid molecular methods to infer SARS-CoV-2 infectivity.</b>	<b>213</b>
6.1. <i>Platinum chloride-based viability RT-qPCR for SARS-CoV-2 detection in complex samples</i>	213
<b>IV. GENERAL DISCUSSION</b>	<b>234</b>
<i>Development of procedures to concentrate and detect Hepatitis E Virus in water samples</i>	234
<i>Prevalence of enteric viruses and viral indicators in influent and effluent water samples from wastewater treatment plants</i>	237
<i>Implementing a SARS-CoV-2 monitoring system in wastewater: Wastewater Based Epidemiology (WBE) as an early-warning tool for pandemic response management.</i>	239
<i>Evaluation of different procedures for coronaviruses' nucleic acid detection in water matrices.</i>	241
<i>Implementing rapid molecular methods to infer SARS-CoV-2 infectivity.</i>	244
<b>V. CONCLUSIONS</b>	<b>248</b>
<b>VII. REFERENCES</b>	<b>251</b>
<b>VIII. ANNEXES</b>	<b>291</b>
Annex A. <i>List of publications included in this thesis</i>	291
Annex B. <i>List of publications not included in this thesis</i>	299
