List of figures	VII
List of tables	XIII
Abstract	XV
Resumen	XIX
Resum	XXIII
Glossary	XXVII
Introduction	1
1. Bone Tissue	3
1.1. Microstructure of bone	4
1.1.1. Bone cell types.....	4
1.1.2. Bone extracellular matrix	6
1.2. Bone's adaptative and regenerative potential	6
1.3. Bone's piezoelectricity.....	7
2. MSCs as main candidates for bone regeneration therapies	9
2.1. Mesenchymal stem cells priming	10
2.2. Priming approaches for MSCs osteogenic fate determination	11

3. <i>In vitro</i> MSCs electrical stimulation	13
3.1. General electrical stimulation.....	13
3.1.1. Direct coupling	13
3.1.2. Capacitive coupling.....	15
3.1.3. Inductive coupling.....	15
3.2. Substrate-mediated electrical stimulation	16
3.2.1. Conductive cell culture supports.....	16
3.2.2. Piezoelectric cell culture supports	19
3.2.2.1. Poly(vinylidene) fluoride	20
3.2.2.1.1. PVDF β -phase nucleation.....	21
3.2.2.2. The magnetoelectric effect.....	23
3.2.2.3. Piezoelectric stimulation at cell culture level.....	24
4. Expression profile of stimulated MSCs and activated signalling pathways ...	27
Hypothesis and Objectives	33
1. Hypothesis.....	33
2. Objectives	34
Chapter 1.	35
1. Effective elastin-like recombinamers coating on poly(vinylidene) fluoride membranes for mesenchymal stem cell culture	37
1.1. Introduction	37
1.2. Materials and methods.....	39
1.2.1. Electroactive membrane preparation.....	39
1.2.2. Membrane characterization	40
1.2.2.1. Morphological analysis.....	40
1.2.2.2. Analysis of the electroactive phases	40
1.2.2.3. Membrane's crystalline content.....	41
1.2.2.4. Poling method and piezoelectric coefficient evaluation	41
1.2.3. Elastin-like recombinamers deposition on poly(vinylidene) fluoride membranes	42
1.2.3.1. Biosynthesis and purification of elastin-like recombinamers.....	42
1.2.3.2. Elastin-like recombinamers chemical modification.....	42
1.2.3.3. Layer-by-Layer procedure for elastin-like recombinamers-covered poly(vinylidene) fluoride membranes.....	43
1.2.3.4. Characterization of elastin-like recombinamers-covered poly(vinylidene) fluoride membranes.....	44
1.2.4. Cell culture assays.....	44
1.2.5. Statistical analysis	45
1.3. Results and discussion	45
1.3.1. Membrane characterization	45
1.3.2. Elastin-like recombinamers deposition by the layer-by-layer technique ...	49
1.3.3. Porcine mesenchymal stem cells response to elastin-like recombinamers layer-by-layer coating.....	52
1.4. Conclusions	54

1.5.	Acknowledgements	54
1.6.	References	55
1.7.	Supplementary material	61
Chapter 2	65
2.	Poly(vinylidene) fluoride membranes coated by heparin/collagen layer-by-layer, smart biomimetic approaches for mesenchymal stem cell culture	67
2.1.	Introduction	68
2.2.	Materials and methods	70
2.2.1.	Membrane preparation by non-solvent induced phase separation	70
2.2.2.	Heparin and collagen type I Layer-by-Layer	70
2.2.3.	Membrane characterization	71
2.2.3.1.	Field emission scanning electron microscopy	71
2.2.3.2.	Fourier transformed infrared spectroscopy	71
2.2.3.3.	Differential scanning calorimetry	72
2.2.3.4.	Vibrational sample magnetometer	72
2.2.3.5.	X-ray photoelectron spectroscopy	72
2.2.3.6.	Determination of heparin concentration	73
2.2.3.7.	Atomic force microscopy	73
2.2.4.	Cell response	73
2.2.5.	Statistical analysis	74
2.3.	Results and discussion	75
2.3.1.	Membrane characterization	75
2.3.2.	Amine graft characterization	79
2.3.3.	Layer-by-layer assembly	82
2.3.4.	Cell response to layer-by-layer coated membranes	84
2.4.	Conclusions	86
2.5.	Acknowledgements	87
2.6.	References	87
Chapter 3	95
3.	Piezoelectric stimulation induces a cytoskeleton response in mesenchymal stem cells cultured on electroactive 2D substrates	97
3.1.	Introduction	98
3.2.	Materials and methods	99
3.2.1.	Electroactive film production	99
3.2.2.	Ionic liquid removal and film poling process	100
3.2.3.	Film characterization	100
3.2.3.1.	Field emission scanning electron microscopy	100
3.2.3.2.	Fourier transform infrared spectroscopy	100
3.2.3.3.	Differential scanning calorimetry	100
3.2.3.4.	Vibrational sample magnetometer	100
3.2.4.	Cell response	101
3.2.4.1.	Initial mesenchymal stem cells response at static mode	101
3.2.4.1.1.	Cytotoxicity/leachable test	101
3.2.4.1.2.	Cell spreading	101

3.2.4.1.3. Proliferation	102
3.2.4.2. Media selection for piezoelectric stimulation.....	102
3.2.4.3. Mesenchymal stem cells response at dynamic mode.....	103
3.2.4.3.1. Vinculin and vimentin immunofluorescence	104
3.2.5. Data and statistical analysis	104
3.3. Results and discussion	104
3.3.1. Film characterization.....	104
3.3.2. Mesenchymal stem cells response to electroactive films at static mode	108
3.3.3. Media selection for piezoelectric stimulation	109
3.3.4. Mesenchymal stem cell response to piezoelectric stimulation at cytoskeleton level.....	111
3.4. Conclusions	115
3.5. Acknowledgements.....	116
3.6. References.....	116
Chapter 4.	123
4. Piezoelectric 3D platform based on poly(vinylidene) fluoride microspheres for mesenchymal stem cell osteogenic differentiation	125
4.1. Introduction	126
4.2. Materials and methods.....	128
4.2.1. Microsphere production by electrospray technique	128
4.2.2. Microsphere characterization.....	128
4.2.2.1. Field Emission Electron Microscopy	128
4.2.2.2. Vibrational sample magnetometer	128
4.2.2.3. Fourier Transform Infrared Spectroscopy	129
4.2.2.4. Differential Scanning Calorimetry.....	129
4.2.3. Microsphere polarization.....	130
4.2.4. Cell response.....	130
4.2.4.1. Microsphere and mesenchymal stem cells encapsulation in 3D gelatin injectable hydrogels.....	130
4.2.4.2. Cell viability assessment.....	131
4.2.4.3. Cell spreading and microsphere distribution.....	131
4.2.4.4. Piezoelectric stimulation influence on mesenchymal stem cells proliferation.....	132
4.2.4.5. Influence of piezoelectric stimulation on mesenchymal stem cells osteogenic differentiation.....	132
4.2.4.5.1. Gene expression analysis	132
4.2.4.5.2. Alkaline phosphatase activity determination.....	133
4.2.5. Statistical analysis	133
4.3. Results and discussion	133
4.3.1. Microsphere characterization.....	134
4.3.2. Human mesenchymal stem cells viability and distribution within the 3D construct.....	137
4.3.3. Effect of piezoelectric stimulation on mesenchymal stem cells proliferation and osteogenic differentiation	139
4.4. Conclusions	142

4.5. Acknowledgements	143
4.6. References	143
4.7. Supplementary material	150
Discussion	151
Conclusions.....	157
Future perspectives	159
Contributions.....	161
1. Publications in scientific journals	161
2. International conferences.....	162
3. National conferences	164
4. Educational related publications	164
References	165
