

INDEX

I. INTRODUCTION	1
1.1. From biomass waste to valorised natural ingredients and biomaterials	3
1.2. Agricultural waste as a potential feedstock for new natural ingredients	4
1.2.1. Watermelon (<i>Citrillus lanatus</i>)	4
1.2.2. Persimmon (<i>Diospyros kaki Thunb.</i>)	5
1.3. Valorisation of pectin-rich biomass	7
1.3.1. Industrial interest of pectin	7
1.3.2. Novel alternative pectin sources	7
1.3.3. Pectin extraction process	9
1.4. Structure and composition of pectin	12
1.4.1. Chemical composition	13
1.4.2. Pectin modifications	16
1.5. Main technological applications of pectin in foods	17
1.5.1. Rheological properties	17
1.5.2. Emulsions	18
1.5.3. Gel formation	20
1.5.4. Novel applications for pectin gels	22
1.5.5. Pectin films and coatings	26
1.6. Miscellaneous applications of bio-functional compounds from biomass residues	27
II. OBJECTIVES	61
III. RESULTS	67
This section includes the results from 7 individual case studies, which have been structured in 2 chapters.	
3.1 CHAPTER 1. VALORISATION OF WATERMELON RIND PECTIN	69
3.1.1 Modelling the extraction of pectin towards the valorisation of watermelon rind waste.	73
3.1.2 Understanding the different emulsification mechanisms of pectin: Comparison between watermelon rind and two commercial pectin sources.	111

3.1.3 Tailoring structural, rheological and gelling properties of watermelon rind pectin by enzymatic treatments.	149
3.1.4 Pectin-based aerogel particles for drug delivery: effect of pectin composition on aerogel structure and release properties.	187
3.2 CHAPTER 2. VALORISATION OF PERSIMMON FRUITS.	233
3.2.1 Bioactive extracts from persimmon waste: Influence of extraction conditions and ripeness.	237
3.2.2 Influence of the extraction conditions on the carbohydrate and phenolic composition of functional pectin from persimmon waste streams.	283
3.2.3 Sustainable bioactive pectin-based films to improve fruit safety via a circular economy approach.	333
IV. GENERAL DISCUSSION	359
V. CONCLUSIONS	369
VI. Annexes	373
Annex A. List of publications included in this thesis	375
Annex B. List of additional publications	380
