Contents	xv
1 Motivation, Hypothesis and Objectives	1
1.1 Structure of the compendium of publications	1
1.1.1 Abstracts of publications	2
1.1.2 Abstract of complementary research	5
1.2 Motivation	6
1.3 Initial Hypothesis	7
1.4 Objectives	8
2 State of the art	11
2.1 Cardiac anatomy and blood circulation	11
2.2 Electrical activity of the heart	13
2.3 Electrocardiographic and electrographic concepts	17
2.3.1 The electrocardiogram	17
2.3.2 The electrogram	21
2.4 Cardiac arrhythmias	22
2.5 Atrial fibrillation	22
2.5.1 Definition	22
2.5.2 Classification of AF	23
2.5.3 Pathophysiology of AF	24
2.5.4 AF treatment	28
2.5.5 AF analysis from ECGs	29
2.5.6 AF analysis from EGMs	30

3	Quantification of Organization in Atrial Fibrillation Electrograms by Coarse-Grained Correlation Dimension	33
3.1	Introduction	33
3.2	Materials	34
3.3	Methods	35
3.3.1	Coarse-grained correlation dimension	36
3.3.2	Computational parameters	37
3.3.3	Statistical analysis	38
3.4	Results	40
3.5	Discussion	44
3.6	Conclusions	45
4	Separate Assessment of Left and Right Atrial Substrate Modification after Catheter Ablation of Paroxysmal Atrial Fibrillation	47
4.1	Introduction	47
4.2	Materials	48
4.3	Methods	49
4.4	Results	51
4.5	Discussion	52
4.6	Conclusions	53
5	Substrate Modification Evaluation after Catheter Ablation of Left and Right Pulmonary Veins	55
5.1	Introduction	55
5.2	Materials	56
5.3	Methods	57
5.4	Results	58
5.5	Discussion	61
5.6	Conclusions	63

6	Evaluation of Substrate Modification after Catheter Ablation of Atrial Fibrillation from Coronary Sinus Electrograms	65
6.1	Introduction	66
6.2	Materials	66
6.3	Methods	67
6.3.1	P-wave and CS LAWs features calculation	67
6.3.2	Statistical analysis	67
6.4	Results	69
6.4.1	Reliability analysis of CS channels	69
6.4.2	Correlations between lead II and CS recordings	70
6.4.3	AF substrate assessment from CS recordings	72
6.5	Discussion	75
6.6	Conclusions	77
7	Discussion	79
7.1	Discussion	79
8	Contributions, Conclusions and Future Lines of Research	87
8.1	Contributions	87
8.2	Conclusions	88
8.3	Future Lines of Research	90
	Appendices	93
A	Study of Similarities Between Organization and Electrical Features of the Atria Before and After Catheter Ablation of Atrial Fibrillation	95
A.1	Introduction	96
A.2	Materials	97
A.3	Methods	98
A.3.1	Statistical analysis	99

A.4 Results	102
A.5 Discussion	107
A.6 Conclusions	110
B Scientific achievements	111
B.1 Publications	111
B.1.1 JCR indexed articles	111
B.1.2 International conferences	112
B.1.3 National conferences	114
B.2 Awards	115
C Compendium of publications: published papers	117
C.1 Short Time Estimation of Fractionation in Atrial Fibrillation with Coarse-Grained Correlation Dimension for Mapping the Atrial Substrate	118
C.2 Splitting the P-wave: Improved Evaluation of Left Atrial Substrate Modification after Pulmonary Vein Isolation of Paroxysmal Atrial Fibrillation	138
C.3 The Dissimilar Impact in Atrial Substrate Modification of Left and Right Pulmonary Veins Isolation after Catheter Ablation of Paroxysmal Atrial Fibrillation	151
C.4 The Relevance of Heart Rate Fluctuation When Evaluating Atrial Substrate Electrical Features in Catheter Ablation of Paroxysmal Atrial Fibrillation	169
Bibliography	185
List of Figures	205
List of Tables	211
List of Acronyms	213
