Abstract	v
Resumen	vii
Resum	ix
Acknowledgements	xi
Abbreviations	xxi
1 Introduction	1
1.1 Contribution	4
1.2 Objectives	5
1.3 Thesis Outline	5
2 Mission Modelling	9
2.1 Environment	10
2.1.1 State of the art	12
2.1.2 Choice of scenarios	14
2.1.3 Urban environment	16
2.1.4 Environment Coordinate system	19
2.1.5 Ground reflection calculation	20
2.2 Aircraft Model	23
2.2.1 State of the art	24
2.2.2 Aircraft dynamics	25
2.2.3 Route generation	26
2.2.4 3D aircraft model	27
2.2.5 Obstruction calculation	28
Intersection algorithm	30
UAS body masking	31
2.2.6 Coordinate systems	32
2.3 Communication Systems	33
2.3.1 Ground network radiation pattern	36
2.3.2 UAS radiation pattern	37
2.3.3 Coordinate systems	37
3 Channel Model	43
3.1 Introduction	43
3.2 Radio Wave Fundamentals and Transmission	44
3.2.1 Attenuation mechanisms	44
Reflection by an isotropic material	45
Reflection/Refraction by an anisotropic material	47

	Diffuse reflection/scattering	47
	Diffraction	48
3.3	Channel Models	48
3.3.1	Ray tracing	48
3.3.2	Statistical models	51
	Measurement campaigns	51
	Proposed models	53
3.3.3	Geometric models	54
	Elliptical geometrical model	54
	Two-ring geometrical model	56
	Street geometrical model	57
3.4	Radio Link Simulation	57
3.4.1	Channel estimation	61
4	Route Optimisation	69
4.1	Introduction	69
4.1.1	Optimisation problems and methods	70
4.1.2	Path smoothing	72
4.1.3	Constraint handling	73
4.2	State of the Art	75
4.2.1	Non-intelligent algorithms	75
4.2.2	Genetic algorithm	77
4.2.3	Particle swarm optimisation	79
4.2.4	Hybridisation	80
4.3	Constrained optimisation	81
4.3.1	Penalty method	85
4.3.2	Adaptive barrier method	87
4.4	Candidate optimisation algorithms	88
4.4.1	Non-intelligent algorithms	88
	Simplex	88
	Generalised Pattern search	89
	Annealing	90
	Quasi-Newton	91
	Surrogate	93
4.4.2	Evolutionary Algorithm	93
4.4.3	Particle Swarm Algorithm	94
4.4.4	Hybrid optimisation	95
4.5	Way forward	95
5	Most suitable optimisation strategy	101
5.1	Designed test scenarios and methodology	101
5.1.1	Scenario 1	101
5.1.2	Scenario 2	102
5.1.3	Scenario 3	103
5.1.4	Scenario 4	104
5.1.5	Test and analysis methodology	105
5.2	Search for a first optimisation algorithm	106
5.3	Performance of evolutionary and particle swarm	107
5.4	Improving particle swarm	109
5.4.1	New cost function	110
5.4.2	Hybridisation	111

5.5	Surrogate optimisation	112
5.6	Selected optimisation approach	115
6	Conclusions	117
6.1	Completion of defined objectives	117
6.1.1	Tools for a successful optimisation	117
6.1.2	Deterministic channel model	119
6.1.3	Route optimisation	119
6.2	Limitations and recommendations	121
6.3	Originality of this work	122
6.4	End note	122
