

Contents

Contents	xiii
List of Figures	xv
List of Tables	xxi
Nomenclature	xxiii
1 Introduction	1
1.1 Background and Motivation	2
1.2 Objectives	5
1.3 Working plan	6
1.4 Contents	7
1.5 References	8
2 Literature review and theoretical framework	13
2.1 Introduction	14
2.2 Aircraft hybridization	14
2.3 Distributed electric propulsion	18
2.4 Boundary Layer Ingestion	20
2.5 Computational Fluid Dynamics	25
2.6 Proper Orthogonal Decomposition	27
2.7 Summary	29
2.8 References	30
3 Aircraft design and component selection	35
3.1 Introduction	37
3.2 Aircraft main design parameters	37
3.3 Design discretization and component selection	41
3.4 Preliminary study on range gains and fuel benefits	44
3.5 Summary	49
3.6 References	50
4 Methods	53

CONTENTS

4.1	Introduction	55
4.2	Computational setup	56
4.3	CFD modelling	61
4.4	Actuator disk modelling	63
4.5	CFD validation	65
4.6	Range mission optimization	66
4.7	POD analysis	71
4.8	Lasso application	74
4.9	Summary	76
4.10	References	77
5	Results	79
5.1	Introduction	85
5.2	Propeller position CFD analysis	85
5.3	Aircraft range optimization	105
5.4	Propeller position POD analysis	121
5.5	Design optimization	146
5.6	Summary	158
5.7	References	159
6	Conclusions and future works	161
6.1	Introduction	162
6.2	CFD analysis conclusions	162
6.3	Range mission optimization conclusions	163
6.4	POD analysis and design conclusions	164
6.5	General Conclusions	165
6.6	Limitations and future works	166
	Bibliography	169
