Abstract	I
Resumen.....	IV
Resum.....	VII
Abbreviations and Acronyms	X
Contents	XIV
Chapter 1. Introduction.....	19
1.1. Artificial intelligence and healthcare.....	19
1.2. Motivations	21
1.3. Objectives.....	24
1.4. Contributions to knowledge	25
1.5. Thesis Structure.....	26
Chapter 2. Background on cardiac magnetic resonance imaging	29
2.1. Introduction	29
2.2. Cardiac anatomy and physiology	30
2.2.1. <i>Anatomical structure</i>	30
2.2.2. <i>Heart function</i>	31
2.3. Magnetic Resonance Imaging	34
2.3.1. <i>Physical principles</i>	34
2.3.2. <i>The MRI technology</i>	36
2.3.3. <i>Cardiac MRI principles</i>	38
2.3.4. <i>Short-axis cine CMRI</i>	40
Chapter 3. Image processing with deep learning	43
3.1. Introduction to deep learning	43
3.2. Artificial neural networks.....	44
3.3. Convolutional neural networks	48
3.4. Considerations in medical imaging	51
3.4.1. <i>Signal intensity</i>	51
3.4.2. <i>Resolution</i>	52
3.4.3. <i>Matrix size</i>	54
3.4.4. <i>Overfitting</i>	55
3.4.5. <i>Dataset size and variability</i>	58
3.4.6. <i>Data augmentation</i>	59
Chapter 4. Materials.....	61
4.1. Dataset.....	61
4.2. Hardware	64
4.2.1. <i>Context</i>	64
4.2.2. <i>Experimental equipment</i>	65

4.3. Software	66
4.3.1. <i>General setting</i>	66
4.3.2. <i>Deep learning software</i>	67
4.3.3. <i>Miscellaneous</i>	67
Chapter 5. Automatic semantic segmentation.....	69
5.1. Introduction and motivation	69
5.2. Related work and state of the art	71
5.2.1. <i>Convolutional neural networks for semantic segmentation</i>	71
5.2.2. <i>Previous research in short-axis cine CMRI segmentation</i>	73
5.3. Material and Methods.....	76
5.3.1. <i>Data</i>	76
5.3.2. <i>Models Architectures</i>	77
5.3.3. <i>Training schedule</i>	80
5.3.4. <i>Segmentation Evaluation</i>	81
5.4. Results.....	81
5.4.1. <i>Training performance</i>	81
5.4.2. <i>Segmentation quality</i>	83
5.4.3. <i>Volumetric estimation quality</i>	85
5.5. Discussion	86
5.6. Conclusions	88
Chapter 6. Automatic biomarker estimation and explainability.....	91
6.1. Introduction and Motivation.....	91
6.2. Related work and state of the art	93
6.2.1. <i>Regression convolutional neural networks</i>	93
6.2.2. <i>Explainability in convolutional neural networks</i>	94
6.2.3. <i>Weak-supervised learning</i>	96
6.3. Material and Methods.....	96
6.3.1. <i>Data</i>	96
6.3.2. <i>Model architecture</i>	98
6.3.3. <i>Training schedule</i>	101
6.3.4. <i>Evaluation method</i>	102
6.4. Results	103
6.4.1. <i>Training performance</i>	103
6.4.2. <i>Volume estimation</i>	104
6.4.3. <i>Derived segmentation</i>	105
6.5. Discussion	107
6.6. Conclusions	111
Chapter 7. Automatic end-systole and end-diastole detection	113
7.1. Introduction and Motivation.....	113
7.2. Related work and state of the art	116
7.3. Material and Methods.....	116
7.3.1. <i>Data</i>	116
7.3.2. <i>Model architecture</i>	118
7.3.3. <i>Training schedule</i>	120
7.3.4. <i>Loss function</i>	121
7.3.5. <i>Prediction post-processing methods</i>	122
7.3.6. <i>Evaluation method</i>	123

7.4. Results	124
7.4.1. <i>Training performance</i>	124
7.4.2. <i>Frame detection</i>	126
7.5. Discussion	127
7.6. Conclusions	130
Chapter 8. Final conclusions	131
8.1. General overview	131
8.2. Limitations	132
8.2.1. <i>Dataset</i>	132
8.2.2. <i>Hardware</i>	133
8.3. Future lines of work	134
8.3.1. <i>Using additional datasets</i>	134
8.3.2. <i>New architectures and training designs</i>	134
8.3.3. <i>Beginning-to-end CAD model training</i>	136
8.3.4. <i>Generative models for synthetic image generation</i>	137
8.3.5. <i>Few-shot learning</i>	137
8.4. Conclusions	137
Chapter 9. References	139
Chapter 10. Publications	159
10.1. Publications derived from this PhD Thesis	159
10.2. Other publications	161
