List of Symbols and Abbreviations

1. Introduction	16
1.1 Catalysis	16
1.2 Heterogeneous catalysis	19
1.3 Solid catalysts	21
1.3.1 Crystal lattices	21
1.3.2 Zeolites	23
1.4 Motivation	28
1.5 References	30
2. Methods and models	
2.1 Electronic structure methods	34
2.1.1 Introduction to the basics	34
2.1.2 Density functional theory	37
2.1.3 The Kohn-Sham approach	39
2.1.4 Approximations to the exchange-correlation functional	41
2.1.5 Dispersion corrections	43
2.1.6 Basis sets	44
2.2 Solid State Calculations	
2.2.1. Reciprocal Space and Bloch's Theorem	46
2.2.2 Plane Wave and Pseudopotentials	47
2.3 Potential Energy Surface (PES)	50
2.3.1 Free Energy	53
2.4 Ab Initio Molecular Dynamics (AIMD)	55
2.5 Models	56
2.5.1 Zeolite Periodic Models	56
2.5.2 Zeolite Cluster Models	57
2.6 References	58

3. Impact of zeolite framework, composition, and flexibility on MTO selectivity	
3.1 Introduction	64
3.2 Methods and models	68
3.3 Chemical and Structural Parameter Connecting Cavity Architecture, Confined Hydrocarbon Pool Species, and MTO Product Selectivity in Small-Pore Cage-Based Zeolites	69
3.4 Framework Composition Impact in MTO Product Selectivity	89
3.5 Expanding the $E_{int(7/5)}$ parameters towards its limits	102
3.5 Conclusions	116
3.6 References	118
4. Design and synthesis of zeolite catalysts for selectively manipulating mechanistic pathways	
4.1 Introduction	122
4.2 Methods and models	128
4.3 DFT Gas Phase Mechanism Study	131
4.4 Fast computational screening of potentially efficient zeolites	137
4.5 Periodic DFT Study of diaryl-mediated transalkylation mechanism	143
4.6 Periodic DFT study of diaryl-mediated disproportionation mechanism	149
4.7 Explicitly introducing the active site: Periodic DFT study of the alkyl-transfer pathway	152
4.8 Synthesis and catalytic test of proposed zeolites	166
4.9 Conclusions	170
4.10 References	172

5. Organic structure directing agents for zeolite synthesis	
5.1 Introduction	178
5.2 Methods and models	180
5.3 Preparation of CHA-type zeolites with low cost templates. Improvements in SCR-NO _x -NH ₃ performance at low temperatures	182
5.3.1 DFT evaluation of host-guest stabilization with simple alkylammonium cations	183
5.3.2 Zeolite synthesis, characterization and reaction	191
5.3.3 Conclusions	193
5.4 Theoretical Prediction for Disperse Al Distribution in AEI Zeolite	194
5.4.1 Mobility of piperidinium based OSDAs	196
5.4.2 Aluminium Distribution in AEI cavities using piperidinium-based OSDAs	209
5.4.3 Conclusions	232
5.5 References	234
6. Conclusions	240
7. Summary	244
8. Resumen	248
9. Resum	252
Appendix I	256
Appendix II	276
