

# Table of Contents

ABBREVIATIONS USED IN THE CURRENT THESIS.....	9
ORIGINAL PUBLICATIONS .....	11
SUMMARY .....	12
RESUMEN – Castellano.....	15
RESUM – Valencià.....	18
OBJECTIVES .....	21
INTRODUCTION .....	22
1. Microbial biofilms .....	22
2. Biofilm formation .....	24
3. Biofilms and quorum sensing .....	27
4. Biofilm forming microorganisms of clinical relevance .....	28
4.1. <i>Staphylococcus</i> spp. ....	28
4.2. <i>Pseudomonas</i> spp. ....	29
4.3. <i>Candida</i> spp. ....	30
5. Oral biofilms .....	31
6. Biofilm study methodologies .....	34
6.1. <i>In vitro</i> biofilm models .....	34
6.2. Microscopy .....	38
6.3. Real-Time Cell Analyzer by impedance measurements .....	39
6.4. <i>In vivo</i> biofilm models .....	41
7. Biofilm treatment .....	44
7.1. Prevention of biofilm formation.....	45
7.2. Biofilm weakening.....	46
7.3. Biofilm disruption.....	46
7.4. Biofilm killing.....	47
8. Nanotechnology and biofilms .....	48
9. The problem of persistence in biofilm cells.....	49
10. Rationale of this thesis .....	50
CHAPTER I	
<b>Effect of dalbavancin on staphylococcal biofilms when administered alone or in combination with biofilm-detaching compounds.....</b>	<b>52</b>
ABSTRACT.....	52

INTRODUCTION .....	53
MATERIALS AND METHODS .....	55
RESULTS .....	58
DISCUSSION .....	68
CHAPTER I SUPPLEMENTARY INFORMATION .....	72
CHAPTER II	
<b>Real-time monitoring of <i>Pseudomonas aeruginosa</i> biofilm growth dynamics and persister cell's eradication.....</b>	<b>75</b>
ABSTRACT .....	75
INTRODUCTION .....	76
MATERIALS AND METHODS .....	77
RESULTS .....	82
DISCUSSION .....	96
CHAPTER II SUPPLEMENTARY INFORMATION .....	98
CHAPTER III	
<b>Real-time monitoring of biofilm growth identifies andrographolide as a potent antifungal compound eradicating <i>Candida</i> biofilms .....</b>	<b>103</b>
ABSTRACT .....	103
INTRODUCTION .....	104
MATERIALS AND METHODS .....	106
RESULTS .....	110
DISCUSSION .....	120
CHAPTER III SUPPLEMENTARY INFORMATION .....	124
CHAPTER IV	
<b>Personalized antibiotic selection in periodontal treatment improves clinical and microbiological outputs .....</b>	<b>128</b>
ABSTRACT .....	128
INTRODUCTION .....	129
MATERIALS AND METHODS .....	130
RESULTS .....	137
DISCUSSION .....	147
CHAPTER IV SUPPLEMENTARY INFORMATION .....	152
CHAPTER V	
<b>Self-propelled nanoparticles for bacterial biofilm eradication.....</b>	<b>177</b>

ABSTRACT.....	177
INTRODUCTION .....	178
MATERIALS AND METHODS.....	179
RESULTS .....	184
Effect of H <sub>2</sub> O <sub>2</sub> on planktonic and biofilm growth.....	184
DISCUSSION .....	191
CHAPTER V SUPPLEMENTARY INFORMATION .....	195
GENERAL DISCUSSION .....	197
1. The challenge of studying and combating biofilms .....	197
2. Are all biofilms the same? .....	198
3. Antibiotic susceptibility tests for biofilms .....	200
4. Conventional therapies against biofilms .....	202
5. Novel strategies against biofilms .....	206
6. Future prospects for biofilm studies.....	210
CONCLUSIONS.....	217
ANNEX A – Published version of CHAPTER I .....	220
ANNEX B – Published version of CHAPTER II .....	221
REFERENCES .....	222
