

| | |
|--|----|
| Summary..... | 1 |
| Resumen..... | 3 |
| Resum..... | 6 |
| Abbreviations | 9 |
| General introduction..... | 13 |
| 1. Plant viruses: history and characteristics | 15 |
| 1.1. A general vision of alpha-, beta-, and gammacarmoviruses | 17 |
| 1.1.1. Genomic organization, gene expression, and replication of alpha-, beta-, and gammacarmoviruses | 17 |
| 2. A brief description of protein multifunctionality..... | 19 |
| 2.1. The coat protein of melon necrotic spot virus | 22 |
| 2.2. Interaction with host factors..... | 23 |
| 2.2.1. Methods for studying protein-protein interaction (PPI) | 25 |
| 2.3. Plant response to pathogens: a brief description of plant immunity | 28 |
| 2.3.1. Effector-triggered immunity: resistance proteins (R) against viruses | 29 |
| 2.3.2. RNA silencing pathway and viral coevolution | 29 |
| 2.3.3. Defense mediated by plant hormones..... | 30 |
| 2.3.4. Epigenetic regulation in plant defense: m6A RNA methylation..... | 32 |
| 3. The role of plant organelles in viral infection..... | 33 |
| 3.1. The retrograde signalling in plant cells..... | 35 |
| 4. Protein import pathway to chloroplasts and mitochondria | 37 |
| 4.1. The translocon complexes of chloroplasts..... | 40 |
| 4.1.1. Translocon of the outer chloroplast membrane: TOC | 40 |

| | |
|---|-----|
| 4.1.2. Translocon of the inner chloroplast membrane: TIC | 43 |
| 4.2. Translocon complexes of mitochondria | 44 |
| 4.2.1. Translocon of the outer mitochondrial membrane: TOM | 44 |
| 4.2.2. Translocon of the inner mitochondrial membrane: TIM | 46 |
| Justification and objectives..... | 49 |
| Chapter I. The mitochondrial and chloroplast dual targeting of a multifunctional plant viral protein modulates chloroplast-to-nucleus communication, RNA silencing suppressor activity, encapsidation, pathogenesis and tissue tropism | 53 |
| ○ Abstract..... | 57 |
| ○ Key words | 57 |
| ○ Introduction..... | 61 |
| ○ Results | 64 |
| ○ Discussion..... | 83 |
| ○ Experimental procedures | 89 |
| ○ Supplementary material | 94 |
| Chapter II. Molecular characterization, targeting and expression analysis of chloroplast and mitochondrion protein import components in <i>Nicotiana benthamiana</i> | 103 |
| ○ Abstract..... | 107 |
| ○ Key words | 107 |
| ○ Introduction..... | 109 |
| ○ Results | 113 |
| ○ Discussion..... | 132 |
| ○ Experimental procedures | 138 |
| ○ Supplementary material | 142 |
| Chapter III. A viral protein targets mitochondria and chloroplasts by hijacking general import pathways and specific receptors..... | 159 |

| | |
|---|------------|
| ○ Abstract..... | 163 |
| ○ Key words | 163 |
| ○ Introduction..... | 165 |
| ○ Results | 168 |
| ○ Discussion..... | 183 |
| ○ Experimental procedures | 189 |
| ○ Supplementary material | 192 |
| Chapter IV. The interactome of a plant viral protein revealed by proximity labeling shows MAPK cascade and splicing components as proviral factors | 199 |
| ○ Abstract..... | 203 |
| ○ Key words | 203 |
| ○ Introduction..... | 205 |
| ○ Results | 208 |
| ○ Discussion..... | 221 |
| ○ Experimental procedures | 227 |
| ○ Supplementary material | 232 |
| General discussion..... | 235 |
| Conclusions..... | 247 |
| References..... | 251 |
| Annex I..... | 273 |
