Abstract	v
Resumen	vii
Resum	ix
List of Acronyms	xi
Contents	xiii
1 Introduction	1
1.1 Resource Sharing in Server Processors	1
1.2 Cloud Computing Paradigm	3
1.3 Objectives of the Thesis	5
1.4 Main Contributions of the Thesis	6
1.5 Thesis Outline	8
2 State of the Art	9
2.1 Resource Management Approaches	9
2.2 Emerging Workloads in Server Processors	12
2.3 Interference in Cloud Systems	15
3 Experimental Framework	17
3.1 Experimental Platforms	17
3.2 Cloud Computing Infrastructure	19
3.3 Resource and Application Manager	22
3.4 Benchmarks	26
3.5 Metrics	28
I High-Performance Computing (HPC)	31
4 Inclusive LLC Resource Management	33
4.1 Application Sensitivity to the LLC Space	34
4.2 Dynamic Behavior of Applications	37
4.3 Critical-Aware Approach	41
4.4 Critical Phase-Aware Proposal	43
4.5 Experimental Setup	49
4.6 Evaluation	50
4.7 Summary	56
5 Non-Inclusive LLC Resource Management	57
5.1 Motivation	57
5.2 Background	58

CONTENTS

5.3	Characterizing L3 Cache Behavior	59
5.4	Cache-Poll Approach	63
5.5	Experimental Setup	66
5.6	Evaluation	68
5.7	Summary	72
6	Core Resource Management	73
6.1	Motivation: Weaknesses of the Default Linux Time-Sharing Scheduler with Graph Workloads	74
6.2	Experimental Setup	75
6.3	Graph Applications' Characterization	76
6.4	Graph Workloads Spatial Scheduler	80
6.5	Performance Evaluation	85
6.6	Summary	89
II	Cloud Computing	91
7	Workload Characterization in the Public Cloud	93
7.1	Experimental Methodology	94
7.2	QoS and Tail Latency Analysis	97
7.3	Major System Resource Consumption Analysis and Findings' Correlation	101
7.4	Analysis of Inter-VM Interference at the Main Shared Resources	106
7.5	Summary	111
8	Detecting and Estimating Inter-VM Interference in the Public Cloud	113
8.1	Motivation	114
8.2	Experimental Setup	115
8.3	Cloud White: Detecting the Inter-VM Interference	117
8.4	Cloud White: Modeling Performance Degradation	120
8.5	Cloud White Evaluation	127
8.6	Comparison to Prior Work	132
8.7	Applying Cloud White to Improve QoS	133
8.8	Summary	134
9	Conclusions	135
9.1	Contributions	135
9.2	Future Directions	139
9.3	Publications	140
	References	143
