Abstract 2

Resumen 3

Resum 4

Acknowledgments 5

Contents 6

1 Introduction 9

1.1. Motivation 9

1.2. Objectives and Contributions 13

1.3. Structure of the thesis 14

2 Related Work and theoretical framework 16

2.1. Pharmaceutical manufacturing process 16

2.1.1. Fluid bed dryer operations 18

2.1.2. Improvements in the drying process 20

2.1.3. Psychometrics and fluid bed dryer 22

2.1.4. Energy consumption advances in fluid bed dryer machines 23

2.2. Industry 4.0 in the pharmaceutical industry 24

2.2.1. Industrial revolution in pharmaceutical manufacturing 24

2.2.2. From Industry 4.0 to Pharma 4.0 27

2.2.3. Digital Twin technology and Industry 4.0 29

2.3. Machine Learning applied to manufacturing 31

2.3.1. Introduction to machine learning 31

2.3.2. Machine learning algorithms 32

2.3.3. Machine learning applied to energy reduction in the manufacturing industry 35

2.4. Introduction to Cloud Computing and IIOT 36

2.4.1. Cloud Computing IaaS, SaaS and PaaS 36

2.4.2. Edge computing 38

2.4.3. Industrial Internet of Things (IIOT) 40
2.4.4. Communications gateway OPC UA 41
2.5. Microsoft Azure Cloud Computing platform 42
2.5.1. MS Azure Databricks 43
2.5.2. MS Machine Learning 44
2.5.3. MS Azure Data Factory 46
2.5.4. MS Azure Data Lake 48
2.5.5. MS Azure IOT Hub 49
2.6. Conclusions 50
3 Data capture and exploratory data analysis (EDA) 52
3.1. Proposed methodology 54
3.2. Data Capture 56
3.3. Exploratory Data Analysis 59
3.3.1. Psychometric model 60
3.3.2. Sensor Exploratory Data Analysis 64
3.3.3. Preheating phase analysis 68
3.3.4. Evaluation of preheating phase for two years production 71
3.4. Conclusions 75
4 Machine Learning model development 77
4.1. Proposed methodology 77
4.2. Data selection 79
4.3. Machine learning algorithms benchmarking 82
4.4. Catboost algorithm 85
4.5. Evaluation of ML algorithms 87
4.6. Catboost adaptation to the fluid bed dyer 89
4.6.1. Catboost model configuration 89
4.6.2. Analysis of Catboost model 91
4.7. Evaluation of the model with fluid bed dryer data 104
4.7.1. Preheating temperature analysis 104

4.7.2. Time duration analysis 105
4.7.3. Energy saving analysis 106
4.8. Conclusions 108
5 Fluid Bed Dryer Cloud-IIOT architecture 110
5.1. On premise and Cloud Computing set- up 112
5.1.1. On premise IOT 113
5.2. Data Ingestion and storage 115
5.2.1. Containers 118
5.3. Machine Learning model deployment 121
5.4. Process monitoring 127
5.5. Visualization 129
5.6. Fluid Bed Dryer Cloud-IIOT energy savings evaluation 133
5.6.1. Real-time batch energy savings analysis 135
5.6.2. Real-time fluid bed dryer time and energy savings 141
5.7. Conclusions 148
6 Conclusions and Future Work 149
6.1. Conclusions 149
6.2. Publications and contributions. 150
6.2.1. Research projects 151
6.2.2. Publications in scientific journals 151
6.2.3. Conferences 152
6.2.4. Awards 152
6.3. Future work 153
6.3.1. Drying process implementation 153
6.3.2. Drug product end-to-end architecture 154
6.3.3. Signal alert device 155
