<b>Abstract</b>	<b>v</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	2
1.2 Main contributions . . . . .	4
<b>2 Design and application of Active Disturbance Rejection Controllers</b>	<b>13</b>
2.1 Introduction . . . . .	14
2.2 Active disturbance rejection control . . . . .	14
2.3 Control problem formulation under the LADRC framework . . . . .	20
2.4 LADRC gains tuning . . . . .	29
2.5 A guide for the LADRC implementation . . . . .	31
2.6 LADRC implementation examples . . . . .	33
<b>3 Tuning Rules for Active Disturbance Rejection Controllers via Multi-objective Optimisation</b>	<b>49</b>
3.1 Introduction . . . . .	50
3.2 Control loop parameterization . . . . .	51
3.3 Multi-objective optimisation design procedure . . . . .	53
3.4 LADRC tuning by multi-objective optimisation . . . . .	60
3.5 Tuning rules for LADRC . . . . .	74
3.6 Validation of the LADRC tuning rules . . . . .	80
3.7 Control of the Peltier thermoelectric module . . . . .	93

<b>4 Modified Active Disturbance Rejection Predictive Control: a fixed-order state-space formulation for SISO systems</b>	<b>99</b>
4.1 Introduction . . . . .	100
4.2 State-Space Model Predictive Control . . . . .	101
4.3 Discrete Linear Active Disturbance Rejection Control . . . . .	103
4.4 Constrained control loop with active disturbance rejection and output pre- dictions . . . . .	106
4.5 Validation examples for the Modified Active Disturbance Rejection Predic- tive Control . . . . .	117
<b>5 Conclusions and future research directions</b>	<b>141</b>
5.1 Conclusions . . . . .	142
5.2 Future research directions . . . . .	148
<b>Bibliography</b>	<b>151</b>
