

TABLE OF CONTENT

| | |
|---|-------------|
| ABBREVIATIONS | <i>i</i> |
| SUMMARY | <i>vii</i> |
| RESUMEN | <i>x</i> |
| RESUM | <i>xiii</i> |
| GENERAL INTRODUCTION | <i>1</i> |
| 1. The family of <i>Cucurbitaceae</i> | 2 |
| 1.1. Economic importance | 2 |
| 1.2. Main limitations of <i>Cucurbitaceae</i> cultivation | 3 |
| 1.2.1 Pests | 4 |
| 1.2.2. Fungal diseases | 6 |
| 1.2.3. Viruses affecting the <i>Cucurbitaceae</i> crops | 6 |
| 1.2.3.1. Virus transmission by aphids | 7 |
| 1.2.3.2. Virus transmission by whiteflies | 8 |
| 1.2.3.3. Virus transmission by contact, seeds, and soil | 9 |
| 1.2.4. Mixed infections of viruses in <i>Cucurbitaceae</i> | 9 |
| 1.2.5. Incidence and virus control in <i>Cucurbitaceae</i> | 11 |
| 1.2.6. Virus evolution in cucurbit crops | 12 |
| 2. Diagnostic methods for identification and detection of plant viruses | 15 |
| 2.1. Serological detection methods | 16 |
| 2.2. Molecular identification methods | 16 |
| 2.2.1. Detection method based on molecular hybridization | 16 |
| 2.2.2. Detection method based on PCR | 17 |
| 2.3. Detection method based on isothermal amplification | 18 |
| 2.4. Detection methods based on High-Throughput Sequencing tools | 19 |
| 3. Cucurbit chloric yellow virus (CCYV) | 20 |
| 3.1. Origin and geographical distribution | 20 |
| 3.2. Classification, genomic structure, and genetic diversity of CCYV | 21 |
| 3.3. Visual evaluation of CCYV symptomology in <i>Cucurbitaceae</i> | 23 |
| 3.4. Transmission of CCYV | 24 |
| 3.5. Diagnostic Methods | 26 |
| 3.6. Genetic resistance to CCYV | 27 |
| 4. Tomato Leaf Curl New Delhi Virus (ToLCNDV) | 28 |
| 4.1. Origin and geographical distribution | 28 |
| 4.2. Classification, and genomic structure of ToLCNDV | 30 |
