

**HABITAT USE AND DISTRIBUTION OF THE
LOGGERHEAD SEA TURTLE (*Caretta caretta*) IN
THE MEDITERRANEAN SEA: IMPLICATIONS FOR
MARINE PLANNING STRATEGIES**

Ph.D. student: Sara Abalo Morla

Directors: Eduardo Jorge Belda Pérez
Jesús Tomás Aguirre
Ohiana Revuelta Avín

Doctor of Philosophy (Ph.D.)

July 2023

Doctorado en Ciencia y Tecnología de la Producción Animal

**UNIVERSITAT
POLITÈCNICA
DE VALÈNCIA**

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	i
TABLE OF CONTENTS	iii
ABSTRACT	vi
RESUMEN	viii
RESUM	x
Chapter 1: Introduction	1
1.1 Background	2
1.1.1 The relevance of the marine biodiversity conservation	2
1.1.2 The loggerhead sea turtle in the Mediterranean Sea	3
1.1.3 Marine turtle conservation in the Mediterranean Sea	7
1.2 Research justification	9
1.3 Thesis outline	10
1.4 Scientific productions	12
Chapter 2: Aim and objectives	17
Aim	18
Objectives	18
Chapter 3: General materials and methods	20
3.1 Study area	21
3.2 Data collection	23
3.2.1 Satellite tagging and monitoring	23
3.2.2 Environmental data	26
3.3 Data analysis	27
3.3.1 Survival	27
3.3.2 Analysis of trajectories	28
3.3.3 Habitat use analyses	29

Chapter 4: Survival and dispersal strategies of loggerhead post-hatchlings in the Mediterranean Sea	34
4.1 Introduction	35
4.2 Methods	37
4.2.1 Turtle data and satellite tagging	37
4.2.2 Data acquisition	40
4.2.3 Dispersion analyses	42
4.2.4 Survival analyses	42
4.3 Results	43
4.3.1 Turtle movements	43
4.3.2 Survival analyses	47
4.4 Discussion	52
4.4.1 Turtle movements	52
4.4.2 Survival analyses	55
Chapter 5: Habitat suitability of loggerhead post-hatchlings in the Mediterranean Sea	59
5.1 Introduction	60
5.2 Methods	62
5.2.1 Turtle data and satellite tagging	62
5.2.2 Data acquisition and data processing	64
5.2.3 Survival analyses	64
5.2.4 Dispersal analyses	64
5.2.5 Habitat use modelling	65
5.3 Results	67
5.3.1 Survival analyses	67
5.3.2 Dispersal analyses	68
5.3.3 Habitat use modelling	79
5.4 Discussion	81

Chapter 6: Marine protected areas and loggerhead turtles in the Mediterranean Sea	87
6.1 Introduction	88
6.2 Methods	90
6.2.1 Studied turtles	90
6.2.2 Location data acquisition and data processing	91
6.2.3 Home range estimation and relative density estimation	92
6.2.4 Use of MPAs	93
6.3 Results	93
6.3.1 Tracking data	93
6.3.2 Relative density, home range and core area estimates	96
6.3.3 Overlap of turtles' home ranges and density maps over MPAs	98
6.3.4 MPAs proposal for loggerhead sea turtle conservation in the Mediterranean Sea	106
6.4 Discussion	108
6.4.1 Spatial distribution	108
6.4.2 Effectiveness of MPA for loggerhead sea turtle protection in the Mediterranean	109
Chapter 7: Inter-nesting and post-nesting behaviour of loggerhead colonizers in Spain	114
7.1 Introduction	115
7.2 Methods	117
7.2.1 Turtle data and satellite tagging	117
7.2.2 Analysis of dispersal and habitat use	120
7.3 Results	120
7.3.1 Behaviour during the nesting and inter-nesting period	123
7.3.2 Behaviour during the post-nesting period	126
7.4 Discussion	129
Chapter 8: General discussion	134
Chapter 9: Conclusions	140
9.1 Conclusions	141
9.2 Future research	143
References	145
Annex I – Satellite tracking data information	179
