CHAPTER 1. Introduction	20
i. Contributions	24
CHAPTER 2. Sustainable Technology Supplier Selection in the Banking Sector	25
2.1 Introduction	25
2.2 Literature Review	27
2.2.1 Sustainability and Criteria in the Supplier Evaluation	27
2.2.2 Criteria Weighting and Multicriteria Approaches	28
2.3 Methodology	30
2.3.1 Analytic Hierarchy Process (AHP)	30
2.3.2 PROMETHEE	31
2.3.3 MAUT	32
2.4 Multicriteria System of Technological Supplier Evaluation in the Banking Sector	32
2.5 Results	35
2.6 Discussion	42
2.7 Conclusions	43
CHAPTER 3. Multicriteria Sorting Method Based on Global and Local Search for Supplier Segmentation	45
3.1 Introduction	45
3.2 Methods for supplier sorting: literature review	47
3.3 Methodology	50
3.3.1 PROMETHEE	50
3.3.2 PROMSORT	51
3.3.3 Quality Index	52
3.4 New multicriteria sorting method for supplier segmentation	52
3.4.1 Sorting algorithm based on Global and Local search of Net Flows	52
3.4.2 Quality index based on an extension of Silhouette for PROMETHEE Sorting	54
3.5 Results	57
3.5.1 Evaluation of the GLNF algorithm by synthetic data	57
3.5.2 Evaluation of the GLNF algorithm by real data from a manufacturing company	61
3.6 Discussion	63

3.7	Conclusions	64
CHAPTER 4. Multiple Criteria Decision Support System for Customer Segmentation using a Sorting Outranking Method		
4.1	Introduction	66
4.2	Literature review	68
4.2.1	RFM model	68
4.2.2	Multicriteria Sorting Problem and PROMETHEE-based methods.....	70
4.2.3	Multicriteria methods in customer segmentation	71
4.3	Methodology	72
4.3.1	The AHP method.....	72
4.3.2	The PROMETHEE method.....	73
4.3.3	The GLNF sorting method	74
4.3.4	Silhouette for sorting (SILS).....	75
4.4	New model for customer segmentation.....	76
4.4.1	The MRFMC model.....	76
4.4.2	MRFMC Model validation: Customer classification in a real consumer packaged goods industry	79
4.5	Results.....	80
4.5.1	Customer segmentation	80
4.5.2	Segmentation analysis with the SILS quality index	84
4.5.3	Segmentation comparison to K-means.....	85
4.6	Discussion	88
4.6.1	Customer segmentation by the MRFMC model.....	88
4.6.2	The MRFMC model and other approaches	89
4.7	Conclusions	90
CHAPTER 5. A Customer Classification Method Based on Two Multicriteria Dimensions.....		
5.1	Introduction.....	92
5.2	Multicriteria classification based on global and local searches on two dimensions.	94
5.2.1	The classification algorithm	94
5.2.2	Empirical case: Consumer segmentation in a consumer packaged goods sector	98
5.3	Results.....	99
5.3.1	Global search.....	99

5.3.2	Intra-segments local search by dimension.....	100
5.3.3	Second local search	102
5.3.4	Final classification of the alternatives	102
5.3.5	Classification compared to results based on global search.	104
5.3.6	Sensitivity analysis.....	105
5.4	Discussion	106
5.5	Conclusions	107
CHAPTER 6. Development of 'PrometheeTools': an R Language Package in the CRAN Repository		109
6.1	Introduction	109
6.2	PrometheeTools: PROMETHEE and GLNF for Ranking and Sorting Problems.....	110
6.3	PROMETHEEII Function: The PROMETHEE Method	110
6.4	GLNF Function: Global and Local Searches of Net Flows for the sorting problem.....	115
6.5	SILS Function: Quality Index of Silhouette for Sorting	119
6.6	Conclusions	122
CHAPTER 7. General discussion of results.....		123
CHAPTER 8. Conclusions.....		128
References.....		132
Appendices.....		147
Appendix A: Glossary of abbreviations.....		147
Appendix B: Criteria for supplier qualification of technology.		149
Appendix C: MAUT utility functions for technology supplier evaluation.		150
Appendix D: Limiting profiles for the sorting of technology suppliers.....		151
Appendix E: SILS results values for sorting of suppliers.		152
Appendix F: Criteria parameters for the sorting of suppliers.....		153
Appendix G: Guiding scale for measuring the level of collaboration in reverse logistics and shared information.		154
Appendix H: Average values by criteria applied to assignments by GLNF sorting and K-means for customer evaluation.....		155
Appendix I: Programming code R for nominal classification method.....		156
Appendix J: Set of variations of preference and indifference thresholds for sensitivity analysis of nominal classification method.....		161
